comprehensive, future-oriented overview of psychological theories and how those theories impact people decisions in today's ever-changing workplace. Taking a rigorous, evidence-based approach, the new Eighth Edition includes more than 1,000 new citations from more than 20 top-tier journal articles. The authors emphasize the latest developments in the field—all in the context of historical perspectives. Integrated coverage of technology, strategy, globalization, and social responsibility throughout the text provides students with a holistic view of the field and equips them with the practical tools to create productive, enjoyable work environments.

of human cognition. In this collection, a team of leading scholars review the spatial domain across a wide variety of languages. Contrary to existing assumptions, they show that there is great variation in the way space is conceptually structured across languages, thus substantiating the controversial question of how far the foundations of human cognition are innate. *Grammars of Space* is a supplement to the psychological information provided in its companion volume, *Space in Language and Cognition*. It represents a new kind of work in linguistics, 'Semantic Typology', which asks what are the semantic parameters used to structure particular semantic fields. Comprehensive and informative, it will be essential reading for those working on comparative linguistics, spatial cognition, and the interface between them.
