1kd Engine Problems

3.0 D-4D 1KD-FTV Engine Problems and Reliability. The Euro IV engine versions had the serious problem with cracked pistons. It usually happens between 60-100k miles (100-150k km). That problem is characterized by the presence of black smoke, strong knocking noise, high crankcase pressure and loss of power. The problem was solved by installing reshaped pistons and new oil jets in 2014.

...

The D4D, sorry, 1KD-FTV is not immune to seizing, even though it ' s 99 percent avoidable if you know where to look. The problem is caused by the oil pick-up in the sump becoming choked up with carbon and debris, restricting the flow of oil, thus destroying any chance of the motor getting the vital lubrication it so rightfully deserves.
