While people profess a disdain for politics, in a democracy politics is the primary vehicle for citizens to influence the decisions and decision makers that shape public policy at every level. This widely acclaimed work provides an overview of public policymaking in all its aspects along with basic information, tools, and examples that will equip citizens to participate more effectively in the policymaking process. It is intended for use in internships and service-learning programs, but will serve equally as a resource for any organized effort to involve citizens in community service and the exercise of civic responsibility. This updated edition includes an all-new case study on the issue of immigration, and all other case studies have been revised.

Have you ever felt too progressive for conservatives, but too conservative for progressives? It's easy for faithful Christians to grow disillusioned with civic engagement or fall into tribal extremes. Representing the AND Campaign, the authors of this book lay out the biblical case for political engagement and help Christians navigate the complex world of politics with integrity.

'Lazere's [book] is heaven-sent and will provide a crucial link in the chain of understanding how conflicts are structured and, most importantly, how they can be rationally addressed - a healthy antidote to the scepticism that has become so pervasive in academic life.' Alan Hausman, Hunter College This innovative book addresses the need for college students to develop critical reading, writing, and thinking skills for self-defence in the contentious arena of American civic rhetoric. In a groundbreaking reconception of composition theory, it presents a comprehensive critical perspective on American public discourse and practical methods for its analysis. Exercises following the text sections and readings help students understand the ideological positions and rhetorical patterns that underlie opposing viewpoints in current controversies - such as the growing inequality of wealth in America and its impact on the finances of college students - as expressed in paired sets of readings from the political left and right. Widely debated issues of whether objectivity is possible and whether there is a liberal or conservative bias in news and entertainment media, as well as in education itself, are foregrounded as topics for rhetorical analysis.

Is this the America you want? If not, here's how to claim the power to change your country. We are in an age of epic political turbulence in America. Old hierarchies and institutions are collapsing. From the election of Donald Trump to the upending of the major political parties to the spread of grassroots movements like Black Lives Matter and \$15 Now, people across the country and across the political spectrum are reclaiming power. Are you ready for this age of bottom-up citizen power? Do you understand what power truly is, how it flows, who has it, and how you can claim and exercise it? Eric Liu, who has spent a career practicing and teaching civic power, lays out the answers in this incisive, inspiring, and provocative book. Using examples from the left and the right, past and present, he reveals the core laws of power. He shows that all of us can generate power-and then, step by step, he shows us how. The strategies of reform and revolution he lays out will help every reader make sense of our world today. If you want to be more than a spectator in this new era, you need to read this book.

Community college faculty can turn to this easy-to-use guide for both the theory and the practice of incorporating civic responsibility concepts into service learning courses. Includes multiple faculty and student exercises, activities, and assessment tools.

Voting is an opportunity to promote, protect, and preserve godly government. Passing up this opportunity means allowing those who would degrade the name of Christ to have their way in our lives. The Bible is clear, "Everyone must submit himself to the governing authorities, for there is no authority except that which God has established" (Romans 13:1). Since the Bible commands that we are to submit to government, we must ask ourselves: to what type of government do we want to submit? God in Government compellingly answers this question and covers other related subjects - often from a historical perspective. The book's emphasis is on how and why the United States has gone from being a Christian nation to a culture of secular humanism. How events like the Industrial Revolution and the Great Depression continue to impact our worldview and the way we vote. The reader will discover the true differences between the political parties, and why groups like labor unions, school teachers, and the media tend to align themselves with a particular party. Among other topics, we examine the Christian roots of capitalism and the truth behind the "separation of church and state." The book covers social issues like legalized abortion, gay rights, and welfare programs; and gives solutions and suggestions as to what Christians can do to get our nation back on track. RAY HARKER is an ideological activist and founder of God in Government, a conservative grassroots movement for which this book is the manual. Both the organization and the book are designed to educate and assist Evangelical Christians in the areas of civic responsibility and political ideology. The outreach provides lectures and seminars for churches and other interested groups. To learn more, visit www.godgov.org.

Increasingly, foundations are finding that participation in public decision making is often a critical component in reaching the impact demanded by mission-related goals. For those weighing precisely what role foundations should play, the mix of real-life examples, practical advice, and inspiration in this book are invaluable.

Numerous studies have chronicled students lack of trust in large social institutions, declining interest in politics, and decreasing civic skills. This book is a comprehensive guide to developing high-quality civic engagement experiences for college students. The book defines civic engagement and explains why it is central to a college education. It describes the state of the art of education for civic engagement and provides guidelines for designing programs that encourage desired learning outcomes. In addition, the book guides leaders in organizing their institutions to create a campus-wide culture of civic engagement.
