~~Solutions Park~~ Economics is intended for undergraduate engineering students taking introductory engineering economics while appealing to the full range of engineering disciplines for which this course is often required: industrial, civil, mechanical, electrical, computer, aerospace, chemical, and manufacturing engineering, as well as engineering technology.

~~Park, Contemporary Engineering Economics + Pearson~~

Here, I will present solve problems typical of those offered in a mathematical economics or advanced microeconomics course. The problems were originally compiled by Dr. Charles N. Steele and are reprinted with his generous permission. The solutions to the problems are my own work and not necessarily the only way to solve the problems.

~~Mathematical Economics Practice Problems and Solutions ...~~

Engineering economy involves technical analysis, with emphasis on the economic aspects, and has the objective of assisting decisions. This is true whether the decision maker is an engineer interactively analyzing alternatives at a computer-aided design workstation or the Chief Executive Officer (CEO) considering a new project. An engineer who is unprepared to excel at engineering economy is ...
