Actor-Network Theory and Technology Innovation: Advancements and New Concepts provides a comprehensive look at the development of actor-network theory itself, as well as case studies of its use to assist in the explanation of various socio-technical phenomena. This book includes topics relating to technological innovation; both those using actor-network theory as an explanatory framework and those using other approaches. It is an excellent source of information regarding ANT as an approach to technological innovation and its link to ICT (Information Communication Technology).

The material of this book encompasses many disciplines, including visible, infrared, far infrared, millimeter wave, microwave, radar, synthetic aperture radar, and electro-optical sensors as well as the very dynamic topics of image processing, computer vision and pattern recognition. This book is composed of six parts: * Advanced background modeling for surveillance * Advances in Tracking in Infrared imagery * Methods for Pose estimation in Ultrasound and LWIR imagery * Recognition in multi-spectral and synthetic aperture radar * Fusion of disparate sensors * Smart Sensors

The apostle Paul was a man of many journeys. We are usually familiar with the geographical ones he made in his own time. This volume traces others--Paul's journeys in our time, as he is co-opted or invited to travel (sometimes as abused slave, sometimes as trusted guide) with modern and recent Continental philosophers and political theorists. Kierkegaard, Nietzsche, Heidegger, and Benjamin; Taubes, Badiou, Zizek, and Agamben--Paul journeys here among the philosophers. In these essays you are invited to travel with them into the regions of philosophy, hermeneutics, political theory, and theology. You will certainly hear the philosophers speak. But Paul will not remain silent. Above the sounds of the journey his voice comes through, loud and clear.

Dream Journal Keep it beside your bed and jot down your dreams in the morning. A4 (8.27" x 11.69" / 21 x 29,7 cm) 50 pages Space for sketch/picture Track related dreams

Paris, 1975; Chelsea, 1984; Birmingham, 1985; Bradford, 1986; Bournemouth, 1990. Many of the most shocking incidents in British football history have involved the hooligan followers of one club: Leeds United. For 40 years they have run riot across the country, punching their way to international notoriety, yet they have remained the most secretive of all mobs. Journalist Caroline Gall spent two years interviewing participants from several generations to piece together the first ever history of the gangs, from the Shipley Skins to the youths of the present day. The apex of this hooligan army was the Service Crew, who adopted their name from the service trains they used instead of the heavily policed 'specials'. They emerged as the casual era dawned and, against the violent backdrop of the Miners' Strike, quickly became feared by their terrace foes. The police eventually launched Operation Wild Boar to take down the ringleaders, only to convict a small number of relative fringe players. Service Crew examines racism at Leeds, chronicles some of the worst incidents of football-related disorder in modern times, and charts the effects of drugs and the rave scene on the hooligans. It is the definitive story of football's most vilified fans.

Detectives Selena Alvarez and Regan Pescoli find their lives in danger after they become targets of a vicious stalker.

Murder Of The Holly King tells the story of Caeser Pink's cross country journey to discover America in the days following the terrorist attacks of 9/11. The Story weaves philosophy, cultural criticism, humor, romance, and biographical memoirs into an engaging motif of death and rebirth. Caeser Pink is the controversial founder of The Imperial Orgy artist community and performance group.

Carry with you the message that you'll never walk alone. Powerful truth and beautiful design.

Computer vision solutions used to be very specific and difficult to adapt to different or even unforeseen situations. The current development is calling for simple to use yet robust applications that could be employed in various situations. This trend requires the reassessment of some theoretical issues in computer vision. A better general understanding of vision processes, new insights and better theories are needed. The papers selected from the conference staged in Dagstuhl in 1996 to gather scientists from the West and the former eastern-block countries address these goals and cover such fields as 2D images (scale space, morphology, segmentation, neural networks, Hough transform, texture, pyramids), recovery of 3-D structure (shape from shading, optical flow, 3-D object recognition) and how vision is integrated into a larger task-driven framework (hand-eye calibration, navigation, perception-action cycle).
