The second in a series of John Deere books published by Quayside, John Deere 52 Backyard Landscaping Projects is the perfect companion and follow-up to John Deere Landscaping and Lawn Care. Once homeowners have a handle on what they need to do to their yard and when the need to do it in order to keep their lawn and landscape green and healthy, they will want to learn how to improve upon it. John Deere 52 Backyard Landscaping Projects provides simple projects that are relevant to today's homeowners. While most books cover, design, building, planting with an extensive gardening section devoted to plant care, types, etc. this book is unique in that it offers simple weekend landscaping projects and it carried the John Deere stamp of approval. Easy to follow step-by-step instructions. All projects can be completed in a weekend's time

Outdoor Living: A Guide to Design, Construction, and Budgeting is a practical guide for consumers who are considering investing in landscapes and outdoor living spaces. Inside this book, readers will discover how to identify quality contractors, how much a project could cost, and ways to enhance their enjoyment of their exterior spaces. This is not a DIY guide, but a rather, a resource to help people understand how to maximize their investment and protect themselves when working with contractors. An educated consumer is able to make the best decision for their circumstances. Dr. Greg Davis, Associate Professor at Kansas State University said, "You'll find in this book many photographs of successful implementation of excellent landscape design projects for outdoor living spaces, and Robyn shares with you some keys to success for those installations. She will show you how to do things yourself if you are so inclined, but because most of us have neither the time, talent, access to high quality materials to embark on such ambitious projects, she goes to lengths to explain in detail what these projects should cost." Davis also says, "If you are someone who is interested in enhancing your outdoor living environment at home or at work, then you will find this to be a unique piece of work. As a landscape design professor, I have bookcases stacked with books about landscape design and construction, and not one of them conveys the central message you will find in this book: that is, "This is the type of quality you should expect from your investment in your outdoor living spaces- and what you should expect it to cost."

Reduce your lawn and your grocery budget. Take gardening to the next level! Would you like to grow healthy food for your table? Do you want to learn the secrets of farming even though you live in a neighborhood? Author Amy Stroos talks straight about why the suburbs might be the ideal place for a small farm. In these pages you'll learn: How to make your landscape as productive as it is beautiful Why the suburbs are primed with food-growing potential How to choose the best crops for succes Why you don't need the perfect yard to have a micro-farm How to use easy permaculture techniques for abundant harvests If you're ready to create a beautiful, edible yard, this book is for you. The Suburban Micro-Farm will show you how to grow your own fruits, herbs, and vegetables even on a limited schedule. From seed to harvest, this book will keep you on track so you feel a sense of accomplishment for your efforts. You'll learn gardening tricks that are essential to success, like how to deal with a 'brown thumb', how to develop and nurture healthy soil, and how to manage garden pests. Although this book has everything a new gardener needs to get started, experienced gardeners will not be disappointed. With helpful tips throughout, you will love the in-depth chapters about permaculture and making money on the micro-farm.

Easy gardening instruction for saving money and eating better by growing your own food in the city

A collection of 38 southern-coastal designs created by landscape professionals includes more than 175 region-specific plants and more than 350 full-color photos and drawings. Original. 10,000 first printing.

This volume takes a fresh look--primarily from a technological perspective--at the nation's "infrastructure": a collection of diverse modes that function as a system supporting a wide range of economic and social activities. Within an infrastructure system, operating and maintenance procedures, management practices, and development policies (i.e., the software) must work together with the facilities' hardware. This study has a strongly local perspective, drawing valuable information from workshops held in Phoenix, Cincinnati, and Boston. These workshops illustrated common elements of local experience that offer infrastructure practitioners, policymakers, and the public at large both understanding and guidance in the form of specific strategies that can lead toward "win-win" situations, where parties with potentially opposing interests seek a way to resolve infrastructure issues so that all parties gain. Local issues, combined across many regions, give infrastructure its strategic national significance. The book recommends specific principles that should be applied in national policy to support effective local infrastructure development and management.

Provides information and guidance on designing plantings for the home yard and includes do-it-yourself outdoor building projects.

Cincinnati Magazine taps into the DNA of the city, exploring shopping, dining, living, and culture and giving readers a ringside seat on the issues shaping the region.

This collection of essays by local activists and nationally recognized scholars deals with the history, status, and dilemmas of environmental justice. These essays provide a comprehensive overview of social and political aspects associated with environmental injustices in minority and poor communities. It will provide a solid platform for dialogue between activists and policymakers or between teachers and students.

A beginner's guide to raising goats as productive pets, offering guidance on choosing a breed, and discussing housing, feeding, milking, making cheese, harvesting cashmere, training goats for tricks or work, and related topics.
