makers."--Archbishop Desmond Tutu "Beyond a brilliantly innovative toolkit for making social change, you will find here a 'deep structure' of activist patterns and principles that can unite millions in creating a new world beyond capitalist sociopathy and strong man despotism. Read this optimistic book for hope in grim times. " --Charles Derber, professor of sociology at Boston College and author of Welcome to the Revolution: Universalizing Resistance for Social Justice and Democracy in Perilous Times Based on face-to-face jam sessions held in Yangon, Amman, Harare, Dhaka, Kampala and Oaxaca, Beautiful Rising includes stories of the Ugandan organizers who smuggled two yellow-painted pigs into parliament to protest corruption; the Burmese students' 360-mile long march against undemocratic and overly centralized education reforms; the Lebanese "honk at parliament" campaign against politicians who had clung to power long after their term had expired; and much more. Now, in one remarkable book, you can find the collective wisdom of more than a hundred grassroots organizers from five continents. It's everything you need for a DIY uprising of your own.

"Elegant and incendiary." --Naomi Klein. As the rise of Bernie Sanders makes clear, "socialism" is no longer a dirty word. It suggests promise, ideals, and community transformation. Progressives now must come up with practical alternatives to what's in place. We can no longer be complainers without solutions. "Beautiful Solutions" pairs critique with innovative solutions that point the way towards a new system. First launched online in partnership with Naomi Klein and Avi Lewis "This Changes Everything: Capitalism vs. The Climate," "Beautiful Solutions" uses as examples communities that fight against the root causes of injustice and working to build something better. Rather than prescribing an orthodoxy, the team behind "Beautiful Solutions" spotlights strategies that work, and can be replicated. These approaches delivered through the book and via grassroots popular education and training can build democratic leadership in communities, strengthen resistance, transform public policy and help shift the broader culture from extraction and dependence to creativity and interdependence. The people featured in this project work in their communities prove things can be done differently--and that systemic change is within our grasp. Featured stories include: Groundbreaking legal battles for indigenous land title in New Zealand and Renewable, indigenous-owned economic development on Pine Ridge reservation in South Dakota; Recuperated workplaces in Argentina and at New Era Windows Cooperative in Chicago; Sukuk (Islamic partial ownership bonds) issued in the Middle East and Southeast Asia; Youthled participatory budgeting in Boston, MA; Social solidarity health clinics in Thessaloniki, Greece, and GreenWave's restorative ocean farming in Long Island Sound."

The Internet has led to revolutions across the world but a crackdown is now in full swing. As whole societies move online, mass surveillance programs are being deployed globally. Our civilization has reached a crossroads. In one direction lies a future promoting "privacy for the weak and transparency for the powerful"; in the other is an internet that transfers power over entire populations to an unaccountable complex of spy agencies and their trans-national corporate allies. Cypherpunks are activists who advocate the mass use of

strong cryptography as a way protecting our basic freedoms against this onslaught. Julian Assange, the editor-in-chief of an visionary behind Wikileaks, has been a leading voice in the cypherpunk movement since the 1990s. Now, in a timely and important new book, Assange brings together a group of rebel thinkers and activists from the front line of the battle for cyberspace to discuss whether the internet will emancipate or enslave all of us.--

A dark, twisted, existential manifesto posing as a book of daily inspiration.

Design academics and practitioners are facing a multiplicity of challenges in a dynamic, complex, world moving faster than the current design paradigm which is largely tied to the values and imperatives of commercial enterprise. Current education and practice need to evolve to ensure that the discipline of design meets sustainability drivers and equips students, teachers and professionals for the near-future. New approaches, methods and tools are urgently required as sustainability expands the context for design and what it means to be a 'designer'. Design activists, who comprise a diverse range of designers, teachers and other actors, are setting new ambitions for design. They seek to fundamentally challenge how, where and when design can catalyse positive impacts to address sustainability. They are also challenging who can utilise the power of the design process. To date, examination of contemporary and emergent design activism is poorly represented in the literature. This book will provide a rigorous exploration of design activism that will re-vitalise the design debate and provide a solid platform for students, teachers, design professionals and other disciplines interested in transformative (design) activism. Design Activism provides a comprehensive study of contemporary and emergent design activism. This activism has a dual aim - to make positive impacts towards more sustainable ways of living and working; and to challenge and reinvigorate design praxis,. It will collate, synthesise and analyse design activist approaches, processes, methods, tools and inspirational examples/outcomes from disparate sources and, in doing so, will create a specific canon of work to illuminate contemporary design discourse. Design Activism reveals the power of design for positive social and environmental change, design with a central activist role in the sustainability challenge. Inspired by past design activists and set against the context of global-local tensions, expressions of design activism are mapped. The nature of contemporary design activism is explored, from individual/collective action to the infrastructure that supports it generating powerful participatory design approaches, a diverse toolbox and inspirational outcomes. This is design as a political and social act, design to enable adaptive societal capacity for co-futuring.
