The BLACK+DECKER Codes for Homeowners 4th Edition is a DIY-friendly guidebook to building codes that shows you just the information you need for the codes that actually impact today's homeowners. Get those home projects you've been putting off done—and up to code. All of the most common standards are addressed in this new edition of BLACK+DECKER Codes for Homeowners, including plumbing, electrical, mechanical, and construction. This guidebook goes beyond simply reporting the codes, it interprets them for you and explains

them clearly, with color photos and simple graphics. This 4th edition is current with the 2017 National Electrical Codes, 2018 Uniform Plumbing Codes, and 2018 International Residential Codes. Written by national codes expert Bruce Barker and created under the supervision of BLACK+DECKER Corp., Codes for Homeowners does what no other code book accomplishes: it makes codes and building standards simple to understand and visualize, so you can be assured that your DIY projects are safe and will pass inspections.

A clear, photographic guide to the building, wiring and plumbing codes that actually matter to single-family homeowners.

Make sure your deck is safe for family and friends with BLACK+DECKER Deck Codes and Standards Bruce Barker, one of the country's leading authorities on building codes, has turned his eye toward one of his favorite subjects: building decks.

Although it's one of the most popular DIY building projects, just about every deck built in the past decade (by pros as well as homeowners) falls short of current codes. In BLACK+DECKER Deck Codes & Standards Barker zeroes in on the main areas of concern and shows accurately and precisely how to design and build it right. Given that every year in the U.S. more than 120,000 people are injured by deck collapses, and more than 50 die, following Barker's careful and detailed advice is the surest way for a homeowner to protect against disaster.

Using the same common-sense approach he used in his bestselling book BLACK+DECKER Codes for Homeowners, Barker isolates the aspects of deck building that are the most frequent sources of trouble and shows--with photos, illustrations, and commentary--exactly how to do it correctly. Barker's new book is not only for DIYers who are building a brand new deck. National deck building codes have changed significantly in the past five years: 4 x 4 posts are no longer allowed for structural purposes that a few years ago were deemed fine and minimum diameter requirements for concrete posts have doubled in many applications, for instance. If your existing deck is more than two or three years old, you'll want this detailed but accessible volume, too.

DIVCodes are a fact of life for do-it-yourselfers, but getting good information on codes can be a nightmare. Anyone who has ever opened a code book (or even a code interpretation book) looking for the answer to a building, wiring or plumbing question has found the same thing: a lot of arcane, technical words and cross-referencing, pages of meaningless charts, but no information that make sense. Codes for Homeowners combines decades of experience by author and IRC-certified home inspector Bruce Barker with Creative Publishing's famous studio photography, and the result is the first truly clear and easy to use codes reference book for homeowners and tradesmen alike. Current with 2009 International Residential Code
