Beginner Friendly Nails - Galaxy Style Shorties Using Gellen Gel Pots Borch Gel L 75 N Borch @ Gel L 75 N is a polyurethane-based, non-ionic liquid rheology modifier for pigment wetting and stabilization that is VOC-, APEO-, and organo tin-free. It is a HEUR thickener that develops viscosity stability in water-based coatings mainly in the medium shear range.~~

Rheology Modifier for Pigment Wetting | Borch @ Gel L 75 N ...

The thickening action of Borch @ Gel L 75 N may be reduced by polar, water soluble film forming solvents such as alcohols, glycols and glycol ethers. However, low polar solvents such as butyl diglycol acetate and Texanol® will increase the viscosity effect.

Borch @ Gel L 75 N

Borch @ Gel L 75 N improves rheological properties for easier brush and roller application, and does not yellow or cause chalking in the cured film. It is used in acrylic gloss-, anti-corrosion- and small particle size emulsion coatings. The recommended dosage is 0.1-2.0% on total paint formulation.

Borch @ Gel L 75 N - Borchers - datasheet

Borch Gel L 75 N Borch @ Gel L 75 N is a polyurethane-based, non-ionic liquid rheology modifier for pigment wetting and stabilization that is VOC-, APEO-, and organo tin-free. It is a HEUR thickener that develops viscosity stability in water-based coatings mainly in the medium shear range. Borchi Gel L 75 N Borchers Home | www.uppercasing

Borchi® Gel L 75 N is a polyurethane based, non-ionic liquid thickener. It acts as a flow promoter in emulsion paints and stabilizes pigmented aqueous paints. The particular molecular structure of Borchi® Gel L 75 N allows its adsorption at the surface of dispersed particles formed as a result of emulsion polymerisation. It is characterised by good efficiency. It improves the rheological ...
