Sir John Franklin's Arctic expedition departed England in 1845 with two Royal Navy bomb vessels, 129 men and three years' worth of provisions. None were seen again until nearly a decade later, when their bleached bones, broken instruments, books, papers and personal effects began to be recovered on Canada's King William Island. These relics have since had a life of their own—photographed, analyzed, cataloged and displayed in glass cases in London. This book gives a definitive history of their preservation and exhibition from the Victorian era to the present, richly illustrated with period engravings and photographs, many never before published. Appendices provide the first comprehensive accounting of all expedition relics recovered prior to the 2014 discovery of Franklin's ship HMS Erebus. p.p1 [margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px 'Times New Roman']

Cadillac has had a long history in the automotive marketplace as General Motors' luxury car division. During the 1980s, Cadillac's management wanted to reestablish the brand as a leader in sophistication, innovation, refinement and prestige. Engineers conceived a new dual-overhead cam, four-valve-per-cylinder V-8 engine—the Northstar. This power plant was the heart of Cadillac's Northstar System, which included a greatly improved suspension and braking system. The division redesigned its entire line to incorporate these new technologies for the 1990s and beyond. The Northstar was the last engine designed and built by Cadillac before the 2005 establishment of GM Powertrain, which took over engine design for all GM divisions. This history of the Northstar V-8 and the cars it powered covers the first generation front-wheel drive Northstar, the second generation rear-wheel drive model, and the supercharged version, along with racing history and the most collectible Northstar-powered Cadillacs.

From 1963 to 1974, muscle cars were the kings of the road—no other American automobiles have ever inspired as much passion as these classic performance cars. Muscle Car Source Book is a one-stop resource for muscle car fans. Heavily illustrated with vivid color photography of all the muscle cars from the classic era (1963-1974) and chock full of data and historical facts, this is a reference book you will not want to put down! All of the manufacturers—Ford, Chevrolet, Pontiac, Buick AMC, Dodge, and Plymouth—are covered, and so are the cars, including the Camaro, Mustang, Charger, GTO, and many more! Statistics: All the performance data available for each car is presented in easily read tables. Specifications: Detailed specifications, including horsepower and torque ratings, curb weight, fuel capacity, stock wheel and tire sizes, and other key technical data unique to each model is given. Production numbers: Production information is broken down across all the performance variants and major features. Options: Major performance options available for each car including engine options, comfort features, gauge packages, and wheel-and-tire options are all outlined.

Promoting Safe Transportation among Older Adults: Perspectives and Strategies provides a concise, comprehensive, and up-to-date resource on safe mobility for an aging population. The book offers an interdisciplinary perspective for understanding and influencing the behavior of older adults with regard to their safe transportation. It is organized around the professions and disciplines that have a stake in the safe transportation of older adults and the role they play at each stage of their mobility needs. The book also addresses the various strategies that have been used to help keep older adults safe and mobile. Readers will find great insights on key issues related to aging and mobility, giving them an overarching framework for how to maintain safe mobility into older adulthood. The book enables readers to understand the perspectives of the critical groups of people involved in keeping older people safe and explores existing strategies by which an aging individual can maintain safe mobility. Utilizes a multidisciplinary, evidence-based approach for examining the complexities of transportation for older adults Offers an integrated, overarching narrative for understanding the key issues of safety and mobility in our aging society Written by leading transportation and health scholars Offers insights into the perspectives of all the stakeholders, such as hands-on transportation and health practitioners, students of varying levels, researchers and policymakers

Traces the development of the 1996 Ford Taurus, and describes the interactions between designers, engineers, marketers, accountants, and manufacturing staff
