CCNA Routing and Switching Practice and Study Guide is designed with dozens of exercises to help you learn the concepts and configurations crucial to your success with the Interconnecting Cisco Networking Devices Part 2 (ICND2 200-101) exam. The author has mapped the chapters of this book to the last two Cisco Networking Academy courses in the CCNA Routing and Switching curricula, Scaling Networks and Connecting Networks. These courses cover the objectives of the Cisco Certified Networking Associate (CCNA) Routing and Switching certification. Getting your CCNA Routing and Switching certification means that you have the knowledge and skills required to successfully install, configure, operate, and troubleshoot a medium-sized routed and switched networks. As a Cisco Networking Academy student or someone taking CCNA-related classes from professional training organizations, or college- and university-level networking courses, you will gain a detailed understanding of routing by successfully completing all the exercises in this book. Each chapter is designed with a variety of exercises, activities, and scenarios to help you: Review vocabulary Strengthen troubleshooting skills Boost configuration skills Reinforce concepts Research and analyze topics

The only authorized Labs and Study Guide for the Cisco Networking Academy Program, Routers and Routing Basics CCNA 2 Labs and Study Guide supplements version 3.1.1 of the Cisco Networking Academy[registered] Program CCNA[registered] 2 course. This Guide maximizes your understanding of: configuring a router; managing Cisco IOS[registered] Software; selecting a routing protocol; verifying and troubleshooting a network; and implementing basic security with access control lists. Each chapter contains a Study Guide section and a Lab Exercises section. Keep all your completed work on hand in this book to study from later, or take advantage of the perforated pages to tear out and hand in specific material for homework assignments. Over 200 exercises in this book help you learn the concepts and configurations crucial to your success as a CCNA exam candidate. Each chapter is slightly different and includes some or all the following types of exercises: vocabulary matching and completion; skill building activities and scenarios; configuration scenarios; concept questions; journal entries; and internet research. you review all the commands covered in the chapter. The book includes all 55 labs from the online course with an additional 15 labs in which you can apply your knowledge about the technologies and concepts introduced. You will get ample opportunity for hands-on practice in three different types of labs: Curriculum Labs are step-by-step exercises designed to introduce you to new concepts. Presenting you with detailed instructions and sometimes additional explanations for completing the lab, Curriculum Labs come directly from the CCNA 2 online course; Comprehensive Labs combine the concepts learned from the course and Curriculum Labs into new experiments. These Exercises provide minimal guidance. You are encouraged to complete the Curriculum Labs before moving on to a Comprehensive Lab; and Challenge Labs are unique labs requiring a thorough understanding of the previously learned network concepts. You should complete all Curriculum Labs and Comprehensive Labs before attempting a
