Net forces (practice) | Effects | Khan Academy

Since the center of the circle (see diagram) is above the riders, then both the net force and the acceleration vectors have an upward direction. The force of gravity is downwards, so the net force is equal to the upward force

## Download Free Central Net Force Model Worksheet 2

minus the downward force:  $F_{\text{net}} = F_{\text{norm}} - F_{\text{grav}}$ . where  $F_{\text{grav}} = m \cdot g = (500. \text{ kg}) \cdot (9.8 \text{ m/s/s}) = 4900 \text{ N}$ . Thus,  $F_{\text{norm}} = F_{\text{net}} + F_{\text{grav}} = 13500 \text{ N} + 4900 \text{ N} = 18400 \text{ N}$   
(part c)
