An AC drive controls the application by continuously adjusting the motor speed. This results in reduced energy usage and prevents unnecessary wear of the equipment. CG offers a wide product range in the low voltage drives segment. Direct torque control and built-in shaft power monitoring are examples of premium features of AC drives.

The Cg Toolkit is a legacy NVIDIA toolkit no longer under active development or support. Cg 3.1 is our last release and while we continue to make it available to developers, we do not recommend using it in new development projects because future hardware features may not be supported. NVIDIA was proud to introduce programmable shading with Cg, which supported dozens of
