or a non-interference engine. In an interference engine, the valves and piston share the same airspace and the timing belt keeps them from touching. This is why you'll have a major engine failure on your hands if the belt breaks or skips.

### How to Know When to Replace Your Timing Belt

I have a 2003 Mazda MX-5. The timing belt was changed in 2013 and the recommended change is every five years or every 50,000 miles. It has now done 94,000 miles. I could do with changing the car but worried the belt will go before I can exchange it. What would you recommend and how much is the car worth? It's 1.8-litre. - For more news, reviews and Top Tens, visit <https://www.honestjohn.co.uk>
