Reinforcement Learning is learning what to do — how to map
situations to actions — so as to maximize a numerical reward signal.

in psychology to refer to any stimuli which strengthens or increases the probability of a specific response. For example, if you want your dog to sit on command, you may give him a treat every time he sits for you.

Chapter 4.3: Reinforcement & Reinforcement Schedules

Reinforcement causes a certain behavior to be repeated or inhibited. Positive reinforcement is the practice of presenting someone with an attractive outcome following a desired behavior. Avoidance learning occurs when someone attempts to avoid an unpleasant condition or outcome by behaving in a way desired by others.

Abstract. In this chapter, we introduce and summarize the taxonomy and categories for reinforcement learning (RL) algorithms. Figure 3.1 presents an overview of the typical and popular algorithms in a structural way. We classify reinforcement learning algorithms from different perspectives, including model-based and model-free methods, value-based and policy-based methods (or combination of the two), Monte Carlo methods and temporal-difference methods, on-policy and off-policy methods.

Chapter 223 - Reinforcement. The rushing horseshoe clatters broke the peaceful morning of Shanghai City as the two horses galloped on the commerce street. The troops reached the black tortoise gate and shouted, "Open the gates, there are urgent military matters!" The ones defending the black tortoise gates were also city protection unit members, and seeing that they were the members protecting the north gate, they immediately ordered to open the city gates.

Chapter 223: Synthetic reinforcement (1) The demon world was vast, so were the kings' territories. Because of this, it often took more than one day for them to reach from one dungeon to another by riding a horse. Kings generally had dozens of dungeons under their control. Given the distance between dungeons took more than one day to reach, it meant dozens of days to travel back and forth between them.
