Rebels and Robbers is about the political economy of violence in post-colonial Angola. This book provides the first comprehensive attempt at analyzing how the military and non-military dynamics of more than four decades of conflict created the structural violence that stubbornly defines Angolan society even in the absence of war. The book clearly demonstrates that the end of the civil war has not ushered in positive peace. The focus on structural violence enables the author to explore the continuities since colonial times, especially in the ways race, class, ethnicity, and power have been used by governing elites as mechanisms to oppress the powerless. Thus, although corruption as structural violence manifesting itself so ubiquitously in Angola today may have been taken to new levels after independence, its origin is unmistakably colonial. Similarly, the zero-sum character of political interactions that defined colonial Angola is yet to be fully exorcized. But there are also important discontinuities. The unabashed propensity to capture public resources for personal aggrandizement is purely post-colonial. So is the tendency toward personal, unaccountable rule. Given its rich endowments, the end of the civil war provides Angola with an opportunity to finally realize its developmental potential. This will depend on whether the wealth resulting from the exploration of natural resources is directed toward creating the conditions for the citizens " realization of their aspirations for the good life thus ensuring sustainable peace. This book will be valuable to academics, practitioners, and the general public interested in gaining a deeper understanding of the political economy of violence in Africa and, more specifically, the interplay between violence, wealth and power in Angola.

This title was first published in 2000: The contributors to this fully documented volume address the debate surrounding the nature, impact and desirability of the complex set of phenomena collectively referred to as 'globalization'. The book breaks new ground by showing globalization in a wide range of areas, including national and transnational corporations, welfare policies, adoption, gendered politics and democratic institutions, citizenship, religion and judicial systems. It is also a truly international volume, including studies from North and South America, Africa and Europe. The book illustrates how globalization entails localization and is best explored through the analysis of institutions. It will be of particular interest to political scientists, sociologists, lawyers and anyone interested in the continual processes of global change.

From factory workers in Welland to retail workers in St. Catharines, from hospitality workers in Niagara Falls to migrant farm workers in Niagara-On-The-Lake, Union Power showcases the role of working people in the Niagara region. Charting the development of the region's labour movement from the early nineteenth century to the present, Patrias and Savage illustrate how workers from this highly diversified economy struggled to improve their lives both inside and outside the workplace. Including extensive quotations from interviews, archival sources, and local newspapers, the story unfolds, in part, through the voices of the people themselves: the workers who fought for unions, the community members who supported them, and the employers who opposed them. Early industrial development and the appalling working conditions of the often vulnerable common labourer prompted a movement toward worker protection. Patrias and Savage argue that union power - power not built on profit, status, or prestige - relies on the twin concepts of struggle and solidarity: the solidarity of the shared interests of the working class and the struggle to achieve common goals. Union Power traces the evidence of these twin concepts through the history of the Niagara region's labour movement. Carmela Patrias is a professor in the Department of History at Brock University. Her publications include: Patriots and Proletarians: Politicizing Hungarian Immigrants in Canada, Discounted Labour: Women Workers in Canada, 1870-1939, co-authored with Ruth Frager, and Jobs and Justice: Fighting Discrimination in Wartime Canada, 1939-1945. Larry Savage is associate professor of labour studies and political science and director of the Jobs and Justice Research Unit at Brock University.

This volume addresses the fraught relationship between market and society in times of social and economic crisis, exploring how they interact in key social, cultural, and political arenas on a global scale. The contributors examine the neoliberal market in anthropological and ethnographic terms to question whether "market logic" has won out against social aspects of human existence in a framework of minimal state protection and the devaluation of human labor. Fruitfully combining empirical data and theoretical approaches, the volume investigates the extent to which ordinary people accept unequal allocations of resources and examines their sense of belonging in an expansive neoliberal economy.

Latin America is one of the most violent regions in the world. It has suffered waves of repressive authoritarian rule, organized armed insurgency and civil war, violent protest, and ballooning rates of criminal violence. But is violence hard wired into Latin America? This is a critical reassessment of the ways in which violence in Latin America is addressed and understood. Previous approaches have relied on structural perspectives, attributing the problem of violence to Latin America's colonial past or its conflictual contemporary politics. Bringing together scholars and practitioners, this volume argues that violence is often rooted more in contingent outcomes than in deeply embedded structures. Addressing topics ranging from the root sources of violence in Haiti to kidnapping in Colombia, from the role of property rights in patterns of violence to the challenges of peacebuilding, *The Politics of Violence in Latin America* is an essential step towards understanding the causes and contexts of violence-and changing the mechanisms that produce it.
