Digital Communication Systems Using Systemvue
Digital Communication Systems Using SystemVue describes the analysis and design of modern digital communication systems and the benefits of using this software. The concepts of digital communication system design, in particular the presence of noise, cannot be conveyed with simple calculations.

SystemVue (Formerly SystemView) by Agilent is a communication systems simulator with advanced capabilities for design, analysis, and implementation in DSP processors and in HDL. Digital Communication Systems Using SystemVue servers as an introduction to simulation for undergraduate students in a contemporary course, where it provides the opportunity to go beyond the lecture or the hardware laboratory.
