This book proposes a new paradigm for English language teaching based on concepts from English for Specific Purposes (ESP) research and applications as well as from growing evidence relating pattern recognition to language learning ability. The contributors to the volume argue that

learners should not try to become proficient all-around users of "idealistic native-like" English, but instead should be realistic about what they need to acquire and how to go about achieving their specific goals. The book discusses the present situation by describing the status quo of English

A Book for Every Teacher: Teaching English Language Learners is a

Access Free S English Language Teaching By

Unique and comprehensive text written for mainstream classroom teachers. The passion for writing this book comes from our working experiences with the K-12 teachers in four school districts through our ELL Center professional development program. Through this program, we provide

Access Free S English Language Teaching By

professional training through our federally funded research and service projects. The purpose of our professional training is to prepare general education teachers to work effectively with English language learners (ELLs). While working with the teachers on a daily basis, we know

Access Free S English Language Teaching By

the immediate needs of the teachers. This motivated us to embark this book project. In recent years, the ELL school population has the highest increase among school populations. As the NEA data indicates, providing ELL students with high quality services and programs is an important

Access Free S English Language Teaching By

investment in America's future (NEA, 2013). This book is our investment in helping teachers to meet their challenges and provide useful information and strategies for teaching ELLs. The book is designed with K-12 teachers in mind. It is best used by teachers who have or will have ELLs

in their classrooms and who seek information and strategies to better work with and serve their ELLs to achieve academic success. With this design, teachers can use the book as a text or reference tool. This book can also be adopted as text materials for professional training. Teachers are the

most important factor for ELLs' academic success.
