In FORTRAN 77  
(and most earlier  
versions), variable  
names beginning  
with the letters I-N  
had a default type  
of integer, while  
variables starting  
with any other  
letters defaulted to

Where To  
Download S  
real, although  
programmers could  
override the  
defaults with an  
explicit declaration.  
This led to the joke:  
"In Fortran, GOD is  
REAL (unless  
declared  
INTEGER)."
