Organized by body system, this book reviews the essentials of diagnosis and management of major conditions in an outline format. Reviewers have indicated consistently that it covers "everything you need to know" for the internal medicine rotation. Includes end-of-chapter USMLE-style questions with explanations as well as a comprehensive exam and case studies in clinical decision-making at the end of the book.

Blueprints Neurology provides students with a complete review of the key topics and concepts—perfect for clerkship rotations and the USMLE. The fourth edition includes new diagnostic and treatment information, an updated appendix of evidence-based resources, and a question bank at the end of the book.

The pediatrics clerkship survival guide written by students who aced the clerkship. This powerful review for the pediatrics clerkship provides medical students taking required rotations with a single, concise, high-yield resource for excelling on the boards and wards. Hundreds of high-yield facts--written by students and based on the clerkship's core competencies--review everything students need to know for the clerkship. Margin notes highlight common exam and "pimp" questions to really help students shine. New to this edition, mini-cases are integrated throughout to give a clinical "face" to disease discussions. A section of "classifieds" include scholarship and award opportunities. A new color insert contains 4 pages of full color images to amplify the text. Features High-yield yet comprehensive review for the pediatrics clerkship based on the clerkship's core competencies Written by students who just completed the clerkship NEW: Integrated mini-cases add clinical relevance and prepare students for questions they will see on the shelf exam and the USMLE Step 2 CK Exam tips and wards tips in the margins help students shine Edited by a pediatrician and reviewed by top faculty to ensure relevance and accuracy The content you need to excel on the pediatric clerkship: Section I: How to Succeed in the Pediatrics Clerkship; Section II: High-Yield Facts, Gestation and Birth, Prematurity, Growth and Development, Nutrition, Health Supervision and Prevention of Injury and Illness in the Well Child, Congenital Malformations and Chromosomal, Anomalies, Metabolic Disease, Immunologic Disease, ID, GI Disease, Respiratory Disease, Cardiovascular Disease, Renal, Gynecologic, and Urinary Disease, Hematologic Disease, Endocrine Disease, Neurologic Disease, ENT, Musculoskeletal Disease, Dermatology, Psychiatry, Section III: Awards and Opportunities, Color Image Section

Surgery: A Case Based Clinical Review provides the reader with a comprehensive understanding of surgical diseases in one easy to use reference that combines multiple teaching formats. The book begins using a case based approach. The cases presented cover the diseases most commonly encountered on a surgical rotation. The cases are designed to provide the reader with the classic findings on history and physical examination. The case presentation is followed by a series of short questions and answers, designed to provide further understanding of the important aspects of the history, physical examination, differential diagnosis, diagnostic work-up and management, as well as questions that may arise on surgical rounds. Key figures and tables visually reinforce the important elements of the disease process. A brief algorithmic flow chart is provided so the reader can quickly understand the optimal management approach. Two additional special sections further strengthen the student's comprehension. The first section covers areas of controversy in the diagnosis or management of each disease, and another section discusses pitfalls to avoid, where the inexperienced clinician might get in trouble. The text concludes with a series of multiple choice questions in a surgery shelf/USMLE format with robust explanations. Surgery: A Case Based Clinical Review is based on 20 years of Socratic medical student teaching by a nine-time Golden Apple teaching awardee from the UCLA School of Medicine and will be of great utility for medical students when they rotate on surgery, interns, physician assistant students, nursing students and nurse practitioner students.

Outline format, high-yield-yet-comprehensive review of pediatric pathophysiology and clinical information, written specifically as a guide for third year medical, PA, or NP students during their pediatrics rotation. Key features include Quick Hits margin notes to highlight key points and a set of 100 "end-of-book" exam questions offered in both print and as a free iPhone app to accompany the text. A website on thePoint offers full text online, plus an image bank, and possible online or mobile video clips or audio clips (ie, heart sounds).

Prepared by residents and attending physicians at Massachusetts General Hospital, this pocket-sized looseleaf is one of the best-selling references for medical students, interns, and residents on the wards and candidates reviewing for internal medicine board exams. In bulleted lists, tables, and algorithms, Pocket Medicine provides key clinical information about common problems in internal medicine, cardiology, pulmonary medicine, gastroenterology, nephrology, hematology-oncology, infectious diseases, endocrinology, and rheumatology. This Fifth Edition is fully updated and includes a sixteen-page

color insert with key and classic abnormal images. If you purchased a copy of Sabatine: Pocket Medicine 5e, ISBN 978-1-4511-8237-8, please make note of the following important correction on page 1-36: Oral anticoagulation (Chest 2012;141:e531S; EHJ 2012;33:2719; Circ 2013;127:1916) All valvular AF as stroke risk very high Nonvalv. AF: stroke risk ~4.5%/y; anticoag @ 68% - stroke; use a risk score to guide Rx: CHADS2: CHF (1 point), HTN (1), Age =75 y (1), DM (1), prior Stroke/TIA (2) CHA2DS2-VASc: adds 65+74 y (1) =75 y (2), vasc dis. [MI, Ao plaque, or PAD (1)]; ? (1) score ³² @ anticoag; score 1 @ consider anticoag or ASA (? latter reasonable if risk factor age 65-74 y, vasc dis. or ?); antithrombotic Rx even if rhythm control [SCORE CORRECTED] Rx options: factor Xa or direct thrombin inhib (non-valv only; no monitoring required) or warfarin (INR 2-3; w/ UFH bridge if high risk of stroke); if Pt refuses anticoag, consider ASA + clopi or, even less effective, ASA alone (NEJM 2009;360:2066) Please make note of this correction in your copy of Sabatine: Pocket Medicine 5e immediately and contact LWW,,s Customer Service Department at 1.800.638.3030 or 1.301.223.2300 so that you may be issued a corrected page 1-36. You may also download a PDF of page 1-36 by clicking [HERE](#). All copies of Pocket Medicine, 5e with the ISBN: 978-1-4511-9378-7 include this correction.

Text and Essentials of Surgical Specialties, Second Edition Package

Publisher's Note: Products purchased from 3rd Party sellers are not guaranteed by the Publisher for quality, authenticity, or access to any online entitlements included with the product. Wolters Kluwers is dedicated to providing quality content. This is a reprint of the Seventh Edition, corrected to address typographical errors identified by reviewers. Blueprints Obstetrics & Gynecology - Clinical high-yield content covers what you need to know for the USMLE, shelf exam, and your Obstetrics & Gynecology rotation!

Ideal as a quick, easy-to-use reference in the laboratory or clinical setting, Atlas of Diagnostic Hematology is an abundantly illustrated guide to the vast range of malignant and non-malignant disorders of the blood. More than 1,200 vibrant, full-color images enable you to identify and compare the unique clinical and histologic features of various blood disorders and confidently reach a diagnosis. Coverage includes photos of actual cases that span the entire range of this complex field, including rare conditions and difficult diagnoses. Features more than 1,200 images including full-color pathologic and clinical images covering a wide range of hematologic malignant and non-malignant conditions. Covers a range of disease stages, from the slightest indication where diagnosis can be complicated or missed entirely, to what the average blood or biopsy sample signifying disease may look like, to an advanced stage where disease indications are abundantly clear. Helps you distinguish between similar and overlapping features and symptoms to arrive at an accurate diagnosis. Provides up-to-date information on infectious processes in blood and bone marrow, classification system of myeloid neoplasms, and indolent and aggressive mature T and NK-cell lymphomas. Includes diagnostic algorithms with differential diagnoses for conditions with similar histologic features and clinical symptoms. Contains the latest WHO classifications for pathologic, genetic, and clinical information.
