The seventh edition of this manual has been fully revised to provide trainees in ophthalmology with the latest advances in their field. Divided into 28 chapters, the book begins with discussion on ocular embryology and anatomy, physiology, neurology, pharmacology, refraction, and history-taking and physical examination. Each of the following chapters is dedicated to the diagnosis and management of disorders and diseases in different parts of the eye – lens, uvea, retina, optic nerve, vitreous and more. The book concludes with sections on ocular injuries, blindness, common surgeries, and surgical instruments. The comprehensive text is further enhanced by nearly 1200 ocular images, figures and tables. Key points Comprehensive guide to diagnosis and management of ocular diseases and disorders for trainees Fully revised, seventh edition providing latest advances in the field Highly illustrated with nearly 1200 images, figures and tables Previous edition (9789352501601) published in 2015

Clinical Methods in Ophthalmology provides undergraduate students with an overview of the theoretical and clinical aspects of ophthalmology. Beginning with an introduction to ophthalmic symptoms and ocular examination, the following sections discuss diagnostic tests, instruments, lenses, drugs and surgery. A clinically structured questionnaire gives students guidance on history taking and physical and systemic examination. A separate chapter is dedicated to case presentation helping students recognise and diagnose symptoms and disorders, with emphasis on clinical applications. This concise, easy to read manual includes more than 400 full colour clinical photographs, illustrations and tables, to assist learning. Key points Overview of theoretical and clinical aspects of ophthalmology for undergraduate students Separate chapters dedicated to case pro forma and case presentation Concise, easy to read format Includes more than 400 full colour photographs, illustrations and tables

With the current rapid development of ophthalmic sciences, it is difficult for ophthalmologists to remain fully up to date with all areas of clinical specialty. The second edition of this atlas describes the latest advances in clinical ophthalmology. Each chapter deals with a separate part of the eye, discussing different diseases and disorders that may be encountered by ophthalmologists. Each condition is accompanied by concise descriptions of major and minor signs, as well as detailed photographs illustrating the disease. This comprehensive new edition features 3750 full colour images and illustrations, including more than 600 additional photographs. Images from the first edition have been replaced with better quality photographs taken with the Haag-Streit BX-900 Photo-Slit Lamp and the Zeiss FF 450 Plus Fundus camera. Key points Comprehensive, new edition bringing ophthalmologists up to date with the latest developments in clinical ophthalmology Each chapter deals with separate part of the eye Features 3750 full colour images and illustrations Includes more than 600 additional photographs Original images replaced with high quality new versions Previous edition published in 2006

Full-color coverage of the latest concepts and technological advances in the diagnosis and management of ophthalmic disorders Clinical Ophthalmology is a combination text and visual reference written to aid the ophthalmologist in the diagnosis of common ophthalmic conditions and in performing surgeries. Written by a team of more than seventy internationally recognized experts, the book provides an understanding of diseases and disorders essential to the everyday practice of ophthalmology. Features Hundreds of full-color photographs Provides an understanding of diseases that are important to everyday practice in ophthalmology Presents modern concepts in corneal diseases, glaucoma, oculoplastics, ocular oncology, infectious and inflammatory diseases, strabismus, trauma and optic nerve disorders Incorporates information about the latest surgical techniques for surgical intervention, practice management and clinical trials in ophthalmology Covers advances in lens surgery covering new concepts in retinal diseases including macular and submacular surgery

The sixth edition of Textbook of Ophthalmology has been completely revised to include the latest developments in the field. Beginning with an introduction to the anatomy and physiology of the eye, the book discusses different ocular diseases and their treatment. This edition includes new chapters on Cryotherapy and Laser Therapy. Each chapter includes references for further research and 1000 questions and answers help with review and revision. Almost 900 images and illustrations, as well as a DVD enhance learning and understanding.

This book is a comprehensive guide to ocular pharmacology for trainees and practising ophthalmologists. Beginning with the basic physiological aspects of ocular pharmacology and ophthalmic drug administration, the following sections discuss different types of drugs used in the treatment of eye disease. The final sections examine contact lens care systems, nutritional supplements and adverse effects of systematically administered drugs into the eye. This useful, quick reference text is highly illustrated with more than 145 images and tables. Key points Comprehensive guide to ocular pharmacology for trainees and practising ophthalmologists Covers different drugs for treatment of eye diseases Includes section on adverse effects of systematically administered drugs Highly illustrated with more than 145 images and tables

Features Fully updated and thoroughly revised edition 100+ New questions have been added from all recent exams up to PGI (May 2018) New Drugs and Recent Advances have been included New chapter on Community Ophthalmology has been added with emphasis on recent changes in policy by NPCB Chapter on Cornea has been completely updated Correlate boxes have been added as New Feature One Liners for quick revision at the end of each chapter Questions with important explanations have been given in Red color TIDE book - text which guides in the right direction
