Despite a number of enticing features, I feel the Eton Solarlink FR500 fails as an emergency radio because of its counter-intuitive, poorly-labeled controls and error-filled, unclear manual. A number of other reviewers have already documented this radio's shortcomings in terms of controls and the manual, so I won't re-hash the same details.

SOLARLINK FR370 OWNER'S MANUAL. SOLARLINK FR370. Thank you for purchasing the SOLARLINK FR370. We want you to thoroughly enjoy the use of this product. To take advantage of its many excellent and unique features, we urge you to carefully read the user's manual.

The current work provides bibliographic information, a worldwide census, ownership records, and a description of the annotations in all the copies of Vesalius' Fabrica. It reconstructs the travels of the Fabrica across the globe since 1543 and its annotated readership.

Your how-to guide to become a ham Ham radio, or amateur radio, is a way to talk with people around the world in real-time, or to send email without any sort of internet connection. It provides a way to keep in touch with friends and family, whether they are across town or across the country. It is also a very important emergency communication system. When cell phones, landlines, the internet, and other systems are down or overloaded, Amateur Radio still gets the message through. Radio amateurs, often called "hams," enjoy radio technology as a hobby, but are often called upon to provide vital service when regular communications systems fail. Ham Radio For Dummies is your guide to everything there is to know about ham radio. Plus, this updated edition provides new and additional information on digital mode operating, as well as use of amateur radio in student science and new operating events. □ Set up your radio station □ Design your ham shack □ Provide support in emergencies and communicate with other hams □ Study for the licensing exam and choose your call sign If you're looking to join a college radio club or just want to learn the latest tips and tricks, this book is a helpful reference guide to beginners, or those who have been "hams" for years.

Neutron Crystallography in Structural Biology, Volume 634, the latest volume in the Methods in Enzymology series, continues the legacy of this premier serial with quality chapters authored by leaders in the field. Chapters in this updated release include Fundamentals of neutron crystallography, Preparation of deuterated and perdeuterated crystals, Large crystal growth for neutron protein crystallography, Monochromatic - BIODIFF at FRM-II, Quasi-Laue 2 - IMAGINE at HIFER, Qusai-Laue 3 DALI (LADI-IIIB at ILL) -Narrow bandpass, Short wavelength - D19 at ILL, MaNDi at SNS, Current status and near future plan of neutron protein crystallography at J-PARC, and much more.

SolderSmoke is the story of a secret, after-hours life in electronics. Bill Meara started out as a normal kid, from a normal American town. But around the age of 12 he got interested in electronics, and he has never been the same. To make matters worse, when he got older he became a diplomat. His work has taken him to Panama, Honduras, El Salvador, the Spanish Basque Country, the Dominican Republic, the Azores islands of Portugal, London, and, most recently, Rome. In almost all of these places his addiction to electronics caused him to seek out like-minded radio fiends, to stay up late into the night working on strange projects, and to build embarrassingly large antennas above innocent foreign neighborhoods. SolderSmoke takes you into the basement workshops and electronics parts stores of these exotic foreign places, and lets you experience the life of an expatriate geek. If you are looking for restaurant or hotel recommendations, look elsewhere. But if you need to know where to get an RF choke re-wound in Santo Domingo, SolderSmoke is the book for you. SolderSmoke is no ordinary memoir. It is a technical memoir. Each chapter contains descriptions of Bill's struggles to understand (really understand) radio-electronic theory. Why does P=IE? Do holes really flow through transistors? What is a radio wave? How does a frequency mixer produce sum and difference frequencies? If these are the kinds of questions that keep you up at night, this book is for you. Finally, SolderSmoke is about brotherhood. International, cross-border brotherhood. Through the SolderSmoke podcast we have discovered that all around the world, in countries as different as Sudan and Switzerland, there are geeks just like us, guys with essentially the same story, guys who got interested in radio and electronics as teenagers, and who have stuck with it ever since. Our technical addiction gives us something in common, something that transcends national differences. And our electronics gives us the means to communicate. United by a common interest in radio, and drawn closer together by means of the internet, we form an "International Brotherhood of Electronic Wizards."

CYBERMONTH Special Pricing. Normally \$15.95. Some preppers are satisfied with easing the inconvenience of a few days without power. Others are ready for years of travail. This book assumes no cell service, no phones, no internet, and no power. That drastic scenario is realistic enough for all levels of preparation. Wherever you fall on the apocalyptic spectrum, communication is critical. Imagine being hunkered in your bunker and wondering, "Does New York City still exist?" Sobering thought. At the most basic level, you need to hear what is happening in the world around you. How will you contact others for aid and support? Don't limit your horizon to how loud you can yell. Radio is your source of information and medium of communication. This book is about radio and covers everything you need when all else fails. Topics include basic radio theory, licensed and unlicensed radio services, operating protocols, choosing equipment, repeaters, antennas, power supplies, batteries, solar power, EMP, and troubleshooting.Written by Buck, K4IA, an experienced Amateur Radio operator and author of the popular EasyWayHamBooks.com license and operating manuals. No prior engineering or radio experience is required. This book shows you "The Easy Way" to be prepared.

In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, Notes from the Hyena's Belly offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

Sir Bentley, an honorable young knight, abandons his calling in order to seek the truth of the Prince. Choosing to live as the Prince did, he forsakes his former lifestyle and wealth to live as a pauper. His travels take him to Holbrook, where the townsfolk live in poverty, paying high taxes to support the lavish lifestyle of Lord Kingsley and his court. But something even darker is lurking in the shadows of the beautiful castle. Bentley soon befriends Eirwyn, a mysterious but compassionate young woman who often distributes food among the poor. When Eirwyn is kidnapped by a ruthless tribe to serve as a sacrifice, Bentley battles a vicious mountain creature to save her life. But when he discovers who is really behind Holbrook's downfall, he's faced with an even bigger challenge: battling the Dark Knight's most evil commander and his Shadow Warriors as they attack the castle. Will greed destroy the kingdom the way it destroyed Lord Kingsley? Or can Sir Bentley and Eirwyn work together to restore order and prosperity to the kingdom through the compassion and grace of the Prince? Journey to Arrethrae, where these knights of noble heart live and die in loyal service to the King and the Prince. These knights are mighty, for they serve a mighty King. They are the Knights of Arrethrae!
