Mary Russell is used to dark secrets--her own, and those of her famous partner and husband, Sherlock Holmes. But what of the other person to whom she has opened her heart: the couple's longtime housekeeper, Mrs. Hudson? Russell's faith and affection are suddenly shattered when a man arrives on the doorstep claiming to be Mrs. Hudson's son. And though what he tells Russell cannot possibly be true, she believes him--as surely as she believes the threat of the gun in his hand. In a devastating instant, everything changes. And afterward, a pool of blood stains the floor, the smell of gunpowder hangs in the air, and most shocking of all: the grim clues point directly to Clara Hudson. Or rather, the woman she was before Baker Street. Now, to uncover the truth, a frantic Sherlock Holmes must put aside his anguish and push deep into his housekeeper's secrets--to a time before her deception, before her crimes were buried. There is death here, and murder, and trust betrayed. And nothing will ever be the same.

This paper addresses the issue of threshold effects between public debt and economic growth in the Caribbean. The main finding is that there exists a threshold debt to gross domestic product (GDP) ratio of 55-56 percent. Moreover, the debt dynamics begin changing well before this threshold is reached. Specifically, at debt levels lower than 30 percent of GDP, increases in the debt-to-GDP ratio are associated with faster economic growth. However, as debt rises beyond 30 percent, the effects on economic growth diminishes rapidly and at debt levels reaching 55-56 percent of GDP, the growth impacts switch from positive to negative. Thus, beyond this threshold, debt becomes a drag on growth.
