Unique, unchanging, and formed five months before birth, fingerprints have been an accepted and infallible means of personal identification for a century. In LIFEPRINTS, Richard Unger presents a groundbreaking method of self-discovery and offers a daily compass for meaning and fulfillment. Combining the science of dermatoglyphics (the study of fingerprints and related line and hand shape designations) with the ancient wisdom of palmistry, the LifePrints system is a simple yet profoundly accurate means of mapping one's life purpose. Like examining an acorn to know what kind of oak tree may one day emerge, reading our fingerprints reveals who we are meant to become. • A guide to discovering one's life purpose by decoding the map revealed in our unique combination of fingerprints. • This new system is based on the author's 25 years of research and fingerprint statistics for more than 52,000 hands. • Features step-by-step instructions for identifying the fingerprints and mapping the life lessons for reaching our full potential. • Includes detailed case studies plus fingerprint readings for Albert Einstein, John F. Kennedy, Amelia Earhart, Walt Disney, Susan B. Anthony, Martin Luther King, Charles Manson, and others.

As volcanic activity steadily increased half the population left the island and the remainder fled in terror to the safe north. This is a personal diary of the first three years of the eruption 1995 to 1998 and concludes with a detailed summary of activity during the years 1999 to 2015. The book is a powerful and graphic description of the realities of living with an unpredictable and extremely dangerous volcano, with the added hazard of several hurricanes. There is tension, tragedy, stress and fear but there is also much laughter and love.
