The Winawer variation of the French is reached after 1.e4 e6 2.d4 d5 3.Nc3 Bb4. This is one of the most exciting openings in the game. It's an alternative universe with alternative rules. In return for the Bishop Black gets a rock solid pawn structure and lots of dynamic capabilities. It should not come as a surprise that in these unbalanced fights Black can really play for a win. The groundwork was done by Nimzowitsch, Botvinnik and Kortchnoi in the old days. Nowadays players like Carlsen, So and Mamedyarov still use their ideas with success. People often ask, "does true

love exist?" Well, Miedema and the French might be one of those rare examples. Fortunately the love has translated to countless novelties and fighting lines. This is his first volume on the French defence and his debut as an author.

Spend more study time on what 's really decisive in your games! The average chess player spends too much time on studying opening theory. In his day, World Chess Champion Emanuel Lasker argued that improving amateurs should spend about 5% of their study time on openings. These days club players are probably closer to 80%, often focusing on opening lines that are popular among grandmasters. Club players shouldn ' t slavishly copy the choices of grandmasters. GMs need to

squeeze every drop of advantage from the opening and therefore play highly complex lines that require large amounts of memorization. The main objective for club players should be to emerge from the opening with a reasonable position, from which you can simply play chess and pit your own tactical and positional understanding against that of your opponent. Gerard Welling and Steve Giddins recommend the Old Indian-Hanham Philidor set-up as a basis for both Black and White. They provide ideas and strategies that can be learned in the shortest possible time, require the bare minimum of maintenance and updating, and lead to rock-solid positions that you will know how to handle. By adopting a similar set-up for both colours, with similar plans and techniques, you will

further reduce study time. Side-stepping Mainline Theory will help you to focus on what is really decisive in the vast majority of non-grandmaster games: tactics, positional understanding and endgame technique.

Why is this repertoire called simple? For the simple reason that the variations are straightforward, easy to remember and require little or no maintenance. International Master Christof Sielecki has created a reliable set of lines for chess players of almost all levels. The major objective is to dominate Black in the opening, by simple means. You don't need to sacrifice anything or memorize long tactical lines. Unless Black plays something stupid, when tactics are the simplest punishment. Sielecki

developed this repertoire working with students who were looking for something that was easy to understand and to learn. Most of the lines he selected are occasionally played by grandmasters, but on the whole they lie outside the mainstream of opening theory. That means that there is hardly any need to monitor theoretical developments. Sielecki always clearly explains the plans and counterplans and keeps you focussed on what the position requires. Ambitious players rated 1500 or higher will get great value out of studying this extremely accessible book.

The Hippopotamus Defence is just what a club player needs. It ' s a straightforward and clear-cut chess opening that avoids the ever growing

body of mainline theory. It ' s universal: Black can use the Hippo against virtually all of White ' s choices (1.e4, 1.d4, 1.c4, 1.f4, the Colle, London, Trompowsky, Réti and others). It ' s not very well known and will surprise many opponents. On top of all that, the Hippo is seriously underestimated: with its characteristic double fianchetto it may look quiet, but inside there lurks a very dangerous animal. FIDE Master Alessio de Santis is one of the world ' s greatest experts on the Hippo and has written a practical, well-structured and accessible manual. His book can be studied on three levels: after a first flash of 3 to 4 hours you will be familiar with the Hippo ' s basic moves and key variations, its strategic themes and recurring manoeuvres. In the second

and third stage De Santis leads you through the most important concrete lines and introduces the Semi-Hippopotamus to counter some specific White ideas. You can use the Hippo as a surprise weapon or as your main repertoire. The extensive explanations and clear conclusions make this book an easy-to-navigate manual for all club players. If you like to confront your opponents with some unexpected counter-attacks, then you need not look any further.

In his prime, in the 1970-s and 80-s, legendary Swedish chess grandmaster Ulf Andersson was a Top 10 player with a distinct, immediately recognizable style. He almost never lost a game and kept scoring wins from quiet positions. Quiet positons? Acclaimed chess author Cyrus Lakdawala has played Andersson ' s lines for decades and explains that those positions only LOOK quiet. Ulf Andersson, who understood the subtleties of strategic chess better than almost anyone else, always detected and exploited hidden

opportunities. As Andersson ' s openings tend to glide into the middlegame and often into the endgame, How Ulf Beats Black is much more than just a chess opening manual. Lakdawala ' s lucid explanations offer a practical guide to positional technique that will improve your endgame skills as well. On top of that it is also a games collection of a great but often misunderstood chess player. This repertoire is not based on forcing variations but on understanding the underlying principles and techniques. As a result your opponent will not be able to surprise you because you forgot to check recent novelties. The final chapter ' What did Ulf play? ' presents exercises to test your understanding.

After the success of his award-winning book *Keep it Simple 1.e4* International Master Christof Sielecki is back. His new repertoire based on 1.d4 has a similar profile: variations that are straightforward and easy to

remember, and require little or no maintenance. Sielecki has created a reliable set of opening lines for chess players of almost all levels. The major objective is to dominate Black from the opening, by simple means. You don ' t need to sacrifice anything or memorize long tactical lines. His main concept is for White to play 1.d4, 2.Nf3, 3.g3, 4.Bg2, 5.O-O and in most cases 6.c4. Sielecki developed this repertoire while working with students who were looking for something that was easy to understand and easy to learn. This new 1.d4 repertoire may be even easier to master than his 1.e4 recommendations, because it is such a coherent system. Sielecki always clearly explains the plans and counterplans and keeps you focussed on what the position requires.
