Geriatrics, or geriatric medicine, is a specialty that focuses on health care of elderly people. It aims to promote health by preventing and treating diseases and disabilities in older adults. There is no set age at which patients may be under the care of a geriatrician, or geriatric physician, a physician who specializes in the care of elderly people.. Rather, this decision is determined by ...

## Geriatrics — Wikipedia

Since most medical care is devoted to those over 65, geriatrics, the medical treatment of the elderly, is a highly important specialty. The specific problems of the elderly include physical inactivity and instability, which result from weakness and loss of energy.
