The European School of Oncology came into existence to respond to a need for information, education and training in the field of the diagnosis and treatment of cancer. There are two main reasons why such an initiative was considered necessary. Firstly, the teaching of oncology requires a rigorously multidisciplinary approach which is difficult for the Universities to put into practice since their system is mainly disciplinary orientated. Secondly, the rate of technological development that impinges on the diagnosis and treatment of cancer has been so rapid that it is not an easy task for medical faculties to adapt their curricula flexibly. With its residential courses for organ pathologies and the seminars on new techniques (laser, monoclonal antibodies, imaging techniques etc.) or on the principal therapeutic controversies (conservative or mutilating surgery, primary or adjuvant chemotherapy, radiotherapy alone or integrated), it is the ambition of the European School of Oncology to fill a cultural and scientific gap and, thereby, create a bridge between the University and Industry and between these two and daily medical practice. One of the more recent initiatives of ESO has been the institution of permanent study groups, also called task forces, where a limited number of leading experts are invited to meet once a year with the aim of defining the state of the art and possibly reaching a consensus on future developments in specific fields of oncology.

When death is that close, will your heart skip a beat? Two patients are admitted to room no. 509. One is a brilliant nineteen-year-old medical student, suffering from an incurable, fatal disease. She counts every extra breath as a blessing. The other is a twenty-five-year-old drug addict whose organs are slowly giving up. He can't wait to get rid of his body. To him, the sooner the better. Two reputed doctors, fighting their own demons from the past, are trying everything to keep these two patients alive, even putting their medical licences at risk. These last days in the hospital change the two patients, their doctors and all the other people around them in ways they had never imagined. *Till the Last Breath* is a deeply sensitive story that reminds us what it means to be alive.

A lively and stimulating invitation to debate the value of art offers a provocative study that will pique the interest of and inspire any reader who loves painting, music, or literature.

An updated version of the classic volume on the beauty of things imperfect, impermanent, and incomplete.

Nunavut tigummiun! Hold on to the land! It was just fifty years ago that the territory of Alaska officially became the state of Alaska. But no matter who has staked their claim to the land, it has always had a way of enveloping souls in its vast, icy embrace. For William L. Iggiagruk Hensley, Alaska has been his home, his identity, and his cause. Born on the shores of Kotzebue Sound, twenty-nine miles north of the Arctic Circle, he was raised to live the traditional, seminomadic life that his Iñupiaq ancestors had lived for thousands of years. It was a life of cold and of constant effort, but Hensley's people also reaped the bounty that nature provided. In *Fifty Miles from Tomorrow*, Hensley offers us the rare chance to immerse ourselves in a firsthand account of growing up Native Alaskan. There have been books written about Alaska, but they've been written by Outsiders, settlers. Hensley's memoir of life on the tundra offers an entirely new perspective, and his stories are captivating, as is his account of his devotion to the Alaska Native land claims movement. As a young man, Hensley was sent by missionaries to the Lower Forty-eight so he could pursue an education. While studying there, he discovered that the land Native Alaskans had occupied and, to all intents and purposes, owned for millennia was being snatched away from them. Hensley decided to fight back. In 1971, after years of Hensley's tireless lobbying, the United States government set aside 44 million acres and nearly \$1 billion for use by Alaska's native peoples. Unlike their relatives to the south, the Alaskan peoples would be able to take charge of their economic and political destiny. The landmark decision did not come overnight and was certainly not the making of any one person. But it was Hensley who gave voice to the cause and made it real. *Fifty Miles from Tomorrow* is not only the memoir of one man; it is also a fascinating testament to the resilience of the Alaskan ilitqusiat, the Alaskan spirit.
