Both new engines are 60-degree V-Twins,
liquid cooled and with internal balancing.
The V-Twin configuration provides a link to
the Harley-Davidson heritage that has seen
the V-Twin engine as the primary power source
for bikes since 1911, often with the engine
as a highlighted design element.

Revolution Max engine - Harley-Davidson

Between 1936 and 2003, engine designs
released by Harley represented a constant
tweaking of the same basic V-twin, 45-degree,
air-cooled engine design. In 2001, Harley
released its first truly new design in a
commercial motorcycle, yet it was still a V-
twin.

What To Do ...*

Motorcycle engines can have between one and six cylinders. For years, the V-twin design was the engine of choice for motorcycle engineers in America, Europe and Japan. The V-twin gets its name from the fact that the two cylinders form a V shape, such as the classic Harley-Davidson V-twin shown below. Notice the 45-degree angle in the Harley ...

The Harley-Davidson Milwaukee-Eight engine is the ninth generation of "big twin" engines developed by the company, but only Harley's third all-new Big Twin in 80 years, first introduced in 2016. These engines differ from the traditional Harley Big Twin engines in that there are four valves per cylinder, totaling eight valves, hence the name.

Harley-Davidson Milwaukee-Eight engine - Wikipedia

A V-twin engine, also called a V2 engine, is a two-cylinder piston engine where the cylinders share a common crankshaft and are arranged in a V configuration.. Although widely associated with motorcycles (installed either transversely or longitudinally), V-twin engines have also been used for industrial engines and in several small cars.
