This Report is one of the first comprehensive studies on young children in India. It focuses on children under 6 years of age and presents key aspects of their well-being and development. With the highest number of neonatal, infant and under-5 deaths in the world, there is an urgent need to address issues that continue to affect the young child in India. This volume: Introduces two young child indices aggregating selected indicators to separately track

child outcomes and child circumstances. Provides an account of the current situation of the young child in terms of physical and cognitive development, access to care, disadvantaged children and major issues that have led to the continued neglect of this age group. Explores the policy and legal framework, fiscal space and the role and obligations of key stakeholders, including the state, private sector, civil society, media and the family. Highlights key recommendations and action points that can help to improve the ecosystem for early childhood care and development. Drawing on specially commissioned technical background papers, supplemented by extensive field experience of Mobile Creches in childcare, this Report will be of interest to practitioners,

The 1991 government change in Ethiopia ushered in a centralised system of governance, aimed to bring about harmony and cooperation between different groups and to promote local self-rule. It has proceeded in two phases: 1991-2001 centred on creating and powering National/Regional Governments,

termed mid-level decentralisation. Further powers were devolved in 2001 through the District Level Decentralization Program and Urban Management Profram. This volume brings together studies by the Forum for Social Studies and others, with the aim of identifying knowledge gaps for further research and to generate debate on the issues in Ethiopia. The study is in two parts: a literature review seeking to document existing studies and highlight research gaps; and field work which involved a rapid assessment of eight weredas and two kifle ketemas in Addis Ababa. The other three studies are synopses of master theses submitted to the Institute of Regional and Local Development Studies of Addis Ababa University.

2011 The book is a comprehensive compendium on child rights in India from a child development perspective. It discusses the challenges that Indian children face for survival, development and education, especially if they are marginalized through disability, lack of care, and poverty. The major issues expounded by the author in relation to rights are infant and child survival, early child development, street and working children, children in conflict with law, children with disabilities, child trafficking and child sexual abuse. The author goes further to delve into the causes, among which are high population, poverty, migration, illiteracy, poor legislation and deep-rooted social norms and behaviour. The book presents the existing policy and legal framework in India for each

Acces PDF Himachal Answer Key Cdpo March

2014 of these issues. The broad purpose of the book is to comprehensively discuss the roadblocks that the marginalized child in India faces, to understand the causes of these roadblocks and to evaluate government and civil society action for children in India.

Drawing from the work of academics and practitioners from ten states across the country, this edited volume showcases and synthesises the diversity and richness of efforts to understand and act on the social determinants of health in India, the conditions in which we are born, grow, live work and age. Such an effort is salient in the current era of Sustainable Development Goals (SDG), which have foregrounded the issue of equity and the need for a

Acces PDF Himachal Answer Key Cdpo March

2014 comprehensive, multi-sectoral agenda for health and development. In India, particularly in the last decade, there have been myriad efforts to more critically theorise and intervene in areas with bearing on health, like conflict, nutrition or urbanisation, or to address the concerns of vulnerable groups like women, children and the elderly. From these efforts emerge lessons of convergence for academic and policymaking institutions in India who are looking to operationalise and bring life to the SDG agenda in India and other Low and Middle Income Country settings. The book comprises eleven chapters and six short commentaries that appear in conversation with each other, as well as an annexure of validated, ready-to-use indicators for monitoring of social determinants of health.

Acces PDF Himachal Answer Key Cdpo March 2014

The book investigates a particular Government of India policy known as the Integrated Child Development Scheme (ICDS). The ICDS operates amongst the poorer sections of the population in India, for pre-school children in the age range of 0-6 years. Although it states that it is for all children, it does not in practice address the question of disabled children. The research examined why and how such a major social policy in the country has segregated the disabled children from its agenda. The findings indicate the gap between policy stated and policy enacted and focus on the lack of cohesion in the directives for the implementation of inclusion into practice.
