2:5). So every evening ... But, when it is full of faith in the Lord, prayer is strong indeed. It can break down walls, fill voids, uproot violence and increase mercy. Praying together is indeed holy ...

"This book focuses on primary education in India and interrogates what schooling means and does to children from weaker sections of Indian society and which values underpin the school system. It examines whether the concept of "education for all" is just a mechanically conceived policy target to chasing enrolment and attendance or whether it a larger social goal and a deeper political statement about the need for attacking entrenched social inequalities, and above all an affirmation of the idea that schooling has a liberating potential. Drawing on original data collected in the two states of Andhra Pradesh and West Bengal, the authors first present the multiple ways in which social class impinges on the educational system, educational processes and educational outcomes. In the second part of the book, issues around autonomy and accountability are explored via an analysis of the position of teachers within the educational hierarchy, and by looking at the various possibilities of making teachers accountable. The last part centres on the learning process, with a particular focus on the classroom. The conclusion includes recommendations that are related to the necessity for a larger debate and normative framework, which includes private schools as possible partners in the pursuing of a public good for which a public entity should take some responsibility, and in conjuncture to that, the necessity to move from government action and responsibilities to a broader concept of public action"--Provided by publisher.

New Log On To Computers (Revised) series consists of eight thoroughly revised and updated textbooks for classes 1–8. The books aim to help learners master the use of various types of software and IT tools. The books have been designed to keep pace with the latest technologies and the interests of the 21st century learners.

Environmental Studies: Understanding the World Around Us is a series of five books for classes 1 to 5 on Environmental Studies. The series strictly follows the new NCERT syllabus and the vision of the National Curriculum Framework (NCF) 2005. The series introduces young learners to their environment. They also learn how to preserve it while reading the books. The books have been written in a child-friendly language and are supported by lively illustrations. The concepts have been explained in a simple, clear and logical manner for better understanding.

1. It is a series of eight textbooks for Classes 1 to 8 that conforms to the vision of National Curriculum Framework and is written in accordance with the latest syllabus of the CBSE. 2. Learning Objectives: Lists well what a learner will know and be able to do after studying the chapter. 3. Let's Recall: Refreshes the concepts learnt in the form of a revision exercise to brush up the concepts taught in previous chapters or grades. 4. Let's Begin: Introduction to the chapter. 5. My Notes: Tips to help the learner remember the important points/formulae taught in the chapter. 6. Let's Try: Simple straight forward questions for quick practice while studying any topic based on the first two levels of Bloom's Taxonomy —Knowledge and Understanding. 7. Error Alarm: Common mistakes which learners commit often along with the correct way of doing the same. 8. Know More: Additional information for the learners relating to the concepts learnt in the chapter. 9. Maths in My Life includes questions relating Maths to daily life and which can help relate the topic with the environment (life) around us. 10. Tricky Maths: Challenge questions to help the learners build thinking skills and reasoning skills by solving tricky questions. 11. Project Work: Projects which can help learners connect Math with our daily life or that take the concepts learnt to a new level. 12. This includes both objective and subjective type of questions. 14. Mental Maths: Maths problems for performing faster calculations mentally. 15. Maths Master: Involves deep critical thinking of learners about any topic, concept, relation, fact or anything related to that chapter. May have open ended questions or extension of the topic. 16. Application in Real-Life: Every chapter in each book also explains how and where it is used in daily life. 17. In the Lab: Math lab activities for helping the learners understand the concepts learnt through hands-on experience. 18. Practice Zone: Chapter-wise practice sheets includes subjective questions for additional practice which are a part of each book.

The Revised Edition of Step by Step Computer Learning Series presents an upgraded module for learning with expertise to understand the other subjects further. In this edition, exercises have been enriched with variety of questions which will help the students to enhanced their skills.

Children are naturally inquisitive and eager to explore and learn about the world around them. It is important for their guardians, both Parents and Teachers, to satisfy their queries, and that too, in such a way that the children are able to understand and comprehend the concepts as well as learn from them. Also, there exists a gap in the level of information and knowledge provided to the children by the Parents vs. that provided by their Teachers. Discrepancies might also exist in the methodology(ies) through which the information and knowledge is relayed. This increases the possibility that the children might either not understand the concept clearly or become confused about the correct interpretation of the concepts. With these objectives in mind, and to build connectivity between the teaching methodologies by Parents and Teachers, we at Oswaal Books, have come up with this Manual for Teachers and Parents. Some benefits of using this manual are: • It aims to aid the Teachers and Parents in simplifying the concepts studied by children as a part of their curriculum • It equips the parents and

teachers to enable the children to understand the subjects, and also evaluate their measure of understanding and creativity. • It includes Learning and Understanding Aids along with a Lesson Plan for each Chapter • It demonstrates Effective Teaching Techniques • It also gives various Propositions for Step-wise Learning and Building up of Concepts IMPORTANT FEATURES OF THE BOOK: Strictly based on latest NCERT Textbook The manual is based on the latest NCERT Textbook 6 Exploratory Learning objectives These provide explicit instructions to parents and teachers to teach their wards Effective Teaching Techniques The manual has tried and tested teaching techniques for higher success rate WHAT THIS BOOK HAS FOR YOU: Lesson Plan for each Chapter This provides clarity and direction to the users Tabulated and Categorized information This helps in creating and effectively executing the lesson plan 5Es of Learning This Manual is based on the 5 Es of Learning: Engage, Explore, Explain, Elaborate & Evaluate About Oswaal Books: We feel extremely happy to announce that Oswaal Books has been awarded as 'The Most Promising Brand 2019' by The Economic Times. This has been possible only because of your trust and love for us. Oswaal Books strongly believes in Making Learning Simple. To ensure student-friendly, yet highly exam-oriented content, we take due care in developing our Panel of Experts. Absolute proof...there is a God! From Darwin to Design shows how Dr. Cagan, a staunch atheist, gradually began realizing that the laws governing the universe are too precise to point to anything but Intelligent Design. Dr. Cagan presents surprising information that will convince you of the awesomeness of God. He makes Himself evident down to, and including, the minutest part of science and math. You will see the creative universe as never before! And find: Answers to the debate between creationism and evolution What to tell your children when they ask about science in school How nature and science both point to God Answers for those who think religion is outdated Here is what to tell people when they ask about the beginning of the world. Dr. Cagan reveals his findings, which will introduce you to the Master Creator as he met Him—through the precise beauty of science.
