The secret to happiness, longevity, and living on is through mentoring the next generation In How to Live Forever, Encore.org founder and CEO Marc Freedman tells the story of his thirty-year quest to answer some of contemporary life's most urgent questions: With so many living so much longer, what is the meaning of the increasing years beyond 50? How can a society with more older people than younger ones thrive? How do we find happiness when we know life is long and time is short? In a poignant book that defies categorization, Freedman finds insights by exploring purpose and generativity, digging into the drive for longevity and the perils of age segregation, and talking to social innovators across the globe bringing the generations together for mutual benefit. He finds wisdom in stories from young and old, featuring ordinary people and icons like jazz great Clark Terry and basketball legend Kareem Abdul-Jabbar. But the answers also come from stories of

Freedman's own mentors—a sawmill worker turned surrogate grandparent, a university administrator who served as Einstein's driver, a cabinet secretary who won the Presidential Medal of Freedom, and the gym teacher who was Freedman's father. *How to Live Forever* is a deeply personal call to find fulfillment and happiness in our longer lives by connecting with the next generation and forging a legacy of love that lives beyond us.

Immortality is a subject which has long been explored and imagined by science fiction writers. In his intriguing new study, Stephen R.L. Clark argues that the genre of science fiction writing allows investigation of philosophical questions about immortality without the constraints of academic philosophy. He reveals how fantasy accounts of issues such as resurrection, disembodied survival, reincarnation and devices or drugs for preserving life can be used as an important resource for philosophical inquiry and examines how a society of immortals might function through a reading of the vampire myth. *How to Live Forever* is a compelling study which introduces students and professional philosophers to the possibilities of using science fiction in their work. It includes extensive suggestions for further reading, both fictional and philosophical, and examines the work of such major science fiction authors as Arthur C. Clarke, Frank Herbert, Larry Niven, William Gibson, and Colin Wilson.

Dr. Grossman sets forth his "Ten Pillars of Health" program, including detoxification, natural hormone therapy, and other health "investments" that he maintains can contribute to the extension of life.

Since man has known himself and became conscious of death, the greatest wish of all has been to become immortal. Such desire led many in the quest for magic sources of eternal youth in nature, magic, religion and art, but also blood drinking rituals. For others, immortality had to be conquered, with wars, empires, ruthless or brave leaderships, and, in most recent years, with the manipulation of the public opinion and use of hypnosis. True Immortality, however, isn't something that we should be searching outside of ourselves but within. One can put his name in history through a huge variety of deeds, good or bad, but a name is just an illusion, just like our identity and personality are as well. The true and only immortal element in a human is his spirit, which by impersonating different entities and expressing himself through different souls, travels through time, from one reality to another, in a never ending cycle of life and death. It is the spirit that becomes the master and the disciple, the king and the slave, the man and the woman, the strong and the weak, the loved and the hated, in order to truly develop a clear perspective of self and learn to discard the ego, while expressing a contradiction inside the drama that is life. In this drama, some times he represents what he fears, and other times who imposes that fear, as well as the one that receives the most and the one that offers plenty. The conscience of self is immortal and never ceases expanding. Knowing that we are immortal and gaining conscience about it is the purpose of this book, which intends to describe the path to such state of mind.
