Manufacturing execution systems (MES), such as SAP ME, serve a critical role in executing production orders by managing processes, ordered steps, and process flows while simultaneously handling data collection. Implementation of an MES involves a high level of organizational change management, a thorough understanding of all existing production processes, and clearly defined objectives for business use cases across business units and production sites.

---

## SAP Manufacturing Execution | SYSTEMA

The primary purpose is to guarantee that the manufacturing operation execution runs smoothly and effectively. SAP MES helps accomplish that objective by collecting accurate, reliable, near real-time data about the entire production lifecycle right from the release of the order to the delivery of the product, which helps improve reliability and traceability of products based on the Internet of Things (IoT).
