Manufacturing

# Access Free Iso 20400 2017

reuse/recycling must be considered using a logic of cross-sectoriality, recognizing the need to enhance the "dialogue" between different sectors; pre-consumer waste is particularly interesting for

the recycling market because the construction sector can reduce its environmental impacts by enhancing its capacity to use secondary raw materials and by-products from other sectors; and lastly, the

Society has  
become  
increasingly  
aware of  
environmental  
and human rights-  
related risks in  
global supply

years. Public  
procurement can

economic,  
environmental

In recent years, the Circular Economy (CE) has

this novel approach, the CE quickly moves from theory to practice and the demand for a coherent and structured strategic approach – one that companies can rely upon when commencing their circular
