The long-awaited literary biography of the supreme 'poets' poet' John Clare (1793-1864) is the greatest labouring-class poet that England has ever produced. No one has ever written more powerfully of nature, of a rural childhood, and of the alienated and unstable self, but until now he has never been the subject of a comprehensive literary biography. Here at last is his full story told by the light of his voluminous work: his birth in poverty, his work as an agricultural labourer, his burgeoning promise as a writer--cultivated under the gaze of rival patrons--then his moment of fame in the company of John Keats and the toast of literary London, and finally his decline into mental illness and his last years confined in asylums. Clare's ringing voice--quick-witted, passionate, vulnerable, courageous--emerges in generous quotation from his letters, journals, autobiographical writings, and his poems, as Jonathan Bate, the celebrated scholar of Shakespeare, brings the complex man, his beloved work, and his ribald world vividly to life.

This is the first anthology of the great "peasant poet's" remarkable verse that makes available the full range of his accomplishments. Here are the different Clares that have beguiled readers for two centuries.

One of eight wonderful collections, celebrating the best of Romantic poetry - also included in the series is Byron, Coleridge, Wordsworth, Shelley, Blake, Burns and Keats.

First published in 2003, Routledge is an imprint of Taylor & Francis, an informa company.

This book investigates what it is that makes John Clare ' s poetic vision so unique, and asks how we use Clare for contemporary ends. It explores much of the criticism that has appeared in response to his life and work, and asks hard questions about the modes and motivations of critics and editors. Clare is increasingly regarded as having been an environmentalist long before the word appeared; this book investigates whether this ' green ' rush to place him as a radical proto-ecologist does any disservice to his complex positions in relation to social class, work, agriculture, poverty and women. This book attempts to unlock Clare ' s own theorisations and practices of what we might now call an ' ecological consciousness ', and works out how his ' eccentric ' mode might relate to that of other Romantic poets. Finally, this book asks how we might treat Clare as our contemporary while still being attentive to the peculiarities of his unique historical circumstances.

John Clare (1793 – 1864) is one of the most sensitive poetic observers of the natural world. Born into a rural labouring family, he felt connected to two communities: his native village and the Romantic and earlier poets who inspired him. The first part of this study of Clare and community shows how Clare absorbed and responded to his reading of a selection of poets including Chatterton, Bloomfield, Gray and Keats, revealing just how serious the process of self-education was to his development. The second part shows how he combined this reading with the oral folk-culture he was steeped in, to create an unrivalled poetic record of a rural culture during the period of enclosure, and the painful transition to the modern world. In his lifelong engagement with rural and literary life, Clare understood the limitations as well as the strengths in communities, the pleasures as well as the horrors of isolation.

This book presents Clare's poetry exactly as he wrote it, and includes selections from his 'mad' poems as well as his earlier descriptions of birds, animals and village life.

John Clare was the great Romantic 'peasant poet' - the chronicler of nature and childhood, the champion of folkways in the face of enclosure and oppression, the love poet, the political satirist and solitary visionary, confined in his maturity to lunatic asylums.

Critics including Seamus Heaney provide a welcome reappraisal in the wake of Clare's bicentenary.

"In this series, a contemporary poet selects and introduces a poet of the past. By their choice of poems and by the personal and critical reactions they express in their prefaces, the editors offer insights into their own work as well as providing an accessible and passionate introduction to the most important poets in our literature. The birds are gone to bed; the cows are still, And sheep lie panting on each old mole hill, And underneath the willow's grey-green bough - Like toil a resting - lies the fallow plough - "Hares at Play":-:--Publisher description.
