Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

Globalisation has become one of the most used and encompassing words over the past decade, of undeniable influence in economics, politics and activism. Globalisation is literally all around, every aspect of life is affected by a global structure of communication and economy. This fully revised and updated guide condenses this complex subject into clear, concise commentary. It examines the debt trap, the acceleration of neoliberalism, competition for energy resources, the links between the war on terror, the arms trade and the alternatives to corporate control.

Learn everything you need to know about the Ferguson MF 35 and TQ35! Featuring step-by-step instructions for weekly checks, operator maintenance, engines, cooling and fuel systems, transmissions, brakes, hydraulics, and so much more, this user-friendly restoration service manual goes back to the basics, detailing a wide range of topics so you can understand your tractor machinery from the inside out! For owners involved in servicing, repairs, or restoration of the Massey Ferguson MF 35 or TQ35, this crystal-clear guide will help you enjoy getting the work done quickly, efficiently, and correctly!

A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States ` accelerated plans to combat the existential threat of climate change finally give reason to hope. In Our Livable World, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, " smart highways " designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoeengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. Our Livable World features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. " An important book that shows the dawn of a new kind of environmental movement an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us. " —Katie Patrick, author of How to Save the World

Assessment and Treatment of Non-Suicidal Self-Injury: A Clinical Perspective is the ideal primer for anyone who works with people who self-injure. Profiling who is affected as well as what their behaviour includes, the book explores the range of factors behind why people self-injure, from the influence of social media to the need for self-regulation, and offers recommendations for both assessment and outpatient treatment. Throughout, the book is permeated by profound respect for those who use self-injury in an attempt to live a good life, while conveying a deep understanding of the challenges that self-injury presents for family members and treatment professionals. It recognizes that the behaviour can spread in hospital wards or other institutional setting, introducing the concept of self-injury by proxy, and assesses the range of therapies available, including CBT, MBT, ERGT and family therapy. Each chapter is complemented by clinical vignettes. In an era when a great number of professionals will come into contact with someone who self-injures – including teachers, social workers and nurses as well as therapists – The Assessment and Treatment of Non-Suicidal Self-Injury is an invaluable resource that examines both the causes and the treatments available.
