**SUNDAY TIMES BESTSELLER** Some people are born to be a certain thing. And I was a born fighter. At the age of eight, Michael Bisping began his training in martial arts. By the time he was 15, he was fighting in his first no holds barred competition. When he turned professional and joined the UFC he was sure about one thing: only a world championship title would do. A British underdog in the greatest fighting championship on earth, he spent the next decade winning some of the championship 's most sensational contests to achieve his dream, becoming the first ever British UFC world champion in 2016. From his boyhood years learning to fight in the gyms of Lancashire to his most shocking clashes in the cage, in *Quitters Never Win* Bisping tells the raw and unfiltered story

behind his legendary career for the first time, including his greatest wins, his fiercest rivals and the harrowing injury that forced him into retirement. As audacious, entertaining and as candid as the man himself, it ' s a backstage pass to one of the world ' s most extreme sports and an unbridled account of what it really takes to become a champion, from sleeping in his own car to reaching the summit of the world ' s fastest growing sport.

Personal computing has reshaped economies and industries, and is transforming how we express ourselves and relate to one another. The most personal of personal computers are the portables. We carry these gadgets with us wherever we go, whether they ' re laptops, smartphones, or the coolest new Web-surfing devices. The Race for Perfect tells the story of two generations of entrepreneurs, designers, and

engineers as they have struggled to make ever-better portables. Steve Hamm takes the reader into a world where inspiration, design, engineering, and marketing come together to produce wave upon wave of the innovative products that we love to talk about and use. From the earliest days of portable computing, 40 years ago, entrepreneurs and designers have pushed forward relentlessly in a quest to create the perfect device. Their efforts have produced a few fabulous successes and many failures. But they never give up. They 're driven by the basic rule of the tech industry: innovate or die. In addition to a fascinating read, *The Race for Perfect* offers valuable lessons for business people in any industry, revealing how they must INNOVATE constantly to differentiate their products CREATE design principles that are timeless INTEGRATE design and engineering so products are both useful and fun to use IMPROVE quality and

convenience without compromise TAP social networks to turn customers into fans

At the center of this tale is the story of a single product, Lenovo ' s ThinkPad X300 laptop. Lenovo, the first Chinese company to seek to establish a global consumer brand, bought IBM ' s PC division in 2005 primarily to get the company ' s storied ThinkPad laptops. The X300 was conceived as a “ halo ” product that would draw customers to Lenovo ' s entire line. Woven through *The Race for Perfect* is a case study of how this ambitious company, with teams in Japan, the United States, and China, marshaled its resources to pursue laptop perfection. As X300 came close to the finish line, it collided head-on with Apple ' s super-slim MacBook Air—with surprising results.

Advanced statistics and new terminology have taken hold of baseball today, but do they accurately reflect the reality of the game? A baseball lifer states his case. America ' s favorite pastime is enduring an assault of new thoughts and ideas. In recent years, the sabermetrics and analytics craze has infiltrated Major League Baseball—from its front offices to dugouts to clubhouses to media covering both, inciting a baseball culture war. New phrases like “ launch angle, ” “ spin rate, ” and “ pitch framing ” have entered the vocabulary, often with little real meaning when it comes to how the game is actually played on the field. No more. In *State of Play*, twelve-year Major League veteran, Emmy Award – winning MLB Network analyst, and bestselling author Bill Ripken breaks down these modern statistical methods to

explain which ones make sense in the game ' s historical context, bringing them together with proven old-school strategies. He simplifies those sabermetric terms hastily added to the baseball lexicon without being fully realized, taking new-school confusion out of old-school baseball ' s tried-and-true common sense. In the end, he unites the teachings of each school to show fans of both how to listen to and understand the game as it ' s played today and how it should be played moving forward. From a true baseball lifer and member of baseball ' s first family, State of Play offers a fascinating insider ' s look at how to reconcile years of historical tradition with the rules and trends of the new millennium. As Ripken sees it: the game inside the game cannot be measured by a spreadsheet—but it can be measured by a qualified, crusty baseball man. Play ball.

A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In *Our Livable World*, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, "smart highways" designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel

created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. Our Livable World features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. “ An important book that shows the dawn of a new kind of environmental movement an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us. ” —Katie Patrick, author of How to Save the World

book, computer-security expert Kevin Mitnick uses true-life stories to show exactly what is happening without your knowledge, and teaches you "the art of invisibility": online and everyday tactics to protect you and your family, using easy step-by-step instructions. Reading this book, you will learn everything from password protection and smart Wi-Fi usage to advanced techniques designed to maximize your anonymity. Invisibility isn't just for superheroes--privacy is a power you deserve and need in the age of Big Brother and Big Data.

This book constitutes the refereed proceedings of the 15th International Symposium on Experimental Algorithms, SEA 2016, held in St. Petersburg, Russia, in June 2016. The 25 revised full papers presented were carefully reviewed and selected from 54 submissions. The main

theme of the symposium is the role of experimentation and of algorithm engineering techniques in the design and evaluation of algorithms and data structures. SEA covers a wide range of topics in experimental algorithmics, bringing together researchers from algorithm engineering, mathematical programming, and combinatorial optimization communities.

Before the Internet became widely known as a global tool for terrorists, one perceptive U.S. citizen recognized its ominous potential. Armed with clear evidence of computer espionage, he began a highly personal quest to expose a hidden network of spies that threatened national security. But would the authorities back him up? Cliff Stoll's dramatic firsthand account is "a computer-age detective story, instantly fascinating [and] astonishingly gripping" (Smithsonian). Cliff Stoll was an astronomer

turned systems manager at Lawrence Berkeley Lab when a 75-cent accounting error alerted him to the presence of an unauthorized user on his system. The hacker's code name was "Hunter"—a mysterious invader who managed to break into U.S. computer systems and steal sensitive military and security information. Stoll began a one-man hunt of his own: spying on the spy. It was a dangerous game of deception, broken codes, satellites, and missile bases—a one-man sting operation that finally gained the attention of the CIA . . . and ultimately trapped an international spy ring fueled by cash, cocaine, and the KGB.
