Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to

Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles evaluates various technologies and methods that could improve the fuel economy of medium- and heavy-duty vehicles, such as tractor-trailers, transit buses, and work trucks. The book also recommends approaches that federal agencies could use to regulate these vehicles' fuel consumption. Currently there are no fuel consumption standards for such vehicles, which account for about 26 percent of the transportation fuel used in the U.S. The miles-per-gallon measure used to regulate the fuel economy of passenger cars. is not appropriate for

medium- and heavy-duty vehicles, which are designed above all to carry loads efficiently. Instead, any regulation of medium- and heavy-duty vehicles should use a metric that reflects the efficiency with which a vehicle moves goods or passengers, such as gallons per ton-mile, a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile. This is called load-specific fuel consumption (LSFC). The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types. For example, using advanced diesel engines in tractor-trailers could lower their fuel consumption by up to 20 percent by 2020, and improved aerodynamics could yield an 11 percent reduction. Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently, such as garbage

trucks and transit buses, by as much 35 percent in the same time frame.

Authentico Foods Inc. has been a part of Detroit's Mexicantown for over thirty years, grown from a home kitchen business to a city-blocklong facility that supplies Mexican tortillas to restaurants throughout the Midwest. Detroit ex-cop and Mexicantown native August Snow has been invited for a business meeting at Authentico Foods. Its owner, Ronaldo Ochoa, is dying, and

August has no interest in running a tortilla empire, but he does want to know who's threatening his neighborhood. Quickly, his investigation takes a devastating turn and he and his loved ones find themselves ensnared in a dangerous net of ruthless billionaire developers. August Snow must fight not only for his life, but for the soul of Mexicantown itself.
