This book on Thesis Writing for Master's and Ph.D. program focuses on the difficulties students encounter with regard to choosing a guide; selecting an appropriate research title considering the available resources; conducting research; and ways to overcome the hardships they face while researching, writing and preparing their dissertation for submission. Thesis writing is an essential skill that medical and other postgraduates are expected to learn during their academic career as a mandatory partial requirement in order to receive the Master's degree. However, at the majority of medical schools, writing a thesis is largely based on self-learning, which adds to the burden on students due to the tremendous amount of time spent learning the writing skills in addition to their exhausting clinical and academic work. Due to the difficulties faced during the early grooming years and lack of adequate guidance, acquiring writing skills continues to be a daunting task for most students. This book addresses these difficulties and deficiencies and provides comprehensive guidance, from selecting the research title to publishing in a scientific journal.

A world-renowned expert in lucid dreaming and Tibetan dream yoga guides us into the tradition's daytime practices, a complement to the nighttime practices taught in his previous book Dream Yoga. Most of us are absolutely certain that we're awake here and now—it's a given, right? Yet, according to Tibet's dream yoga tradition, ordinary waking life is no more real than the illusions of our nightly dreams. In his previous book Dream Yoga, Andrew Holecek guided us into Tibetan Buddhism's nocturnal path of lucid dreaming and other dimensions of sleeping consciousness. Now, with Dreams of Light, he offers us an in-depth, step-by-step guide to its daytime practices. Known as the "illusory form" practices, these teachings include insights, meditations, and actions to help us realize the dreamlike nature of our lives. Through an immersive exploration of the tradition, beginners and seasoned practitioners alike will learn everything they need to deeply transform both their sleeping and waking hours. "If you've struggled to awaken in your dreams," teaches Holecek, "these techniques will often spark spontaneous lucidity during sleep. And if you're already a successful lucid dreamer, they will open you to new depths of experience throughout your day." For those wishing to explore Tibetan Buddhism's profound path for awakening to the true nature of reality—day or night—Dreams of Light shows us the way.
