Medical interview book specifically for CT, ST and Registrar interviews. Includes detailed techniques and examples as well as up-to-date explanations on current NHS issues and reforms.

Primary care medicine is the new frontier in medicine. Every nation in the world has recognized the necessity to deliver personal and primary care to its people. This includes first-contact care, care based in a positive and caring personal relationship, care by a single healthcare provider for the majority of the patient's problems, coordination of all care by the patient's personal provider, advocacy for the patient by the provider, the provision of preventive care and psychosocial care, as well as care for episodes of acute and chronic illness. These facets of care work most effectively when they are embedded in a coherent integrated approach. The support for primary care derives from several significant trends. First, technologically based care costs have rocketed

beyond reason or availability, occurring in the face of exploding populations and diminishing real resources in many parts of the world, even in the wealthier nations. Simultaneously, the primary care disciplines-general internal medicine and pediatrics and family medicine-have matured significantly.

This 2006 volume provides a comprehensive discussion of communication between doctors and patients in primary care consultations. It brings together a team of leading contributors from the fields of linguistics, sociology and medicine to describe each phase of the primary care consultation, identifying the distinctive tasks, goals and activities that make up each phase of primary care as social interaction. Using conversation analysis techniques, the authors analyze the sequential unfolding of a visit, and describe the dilemmas and conflicts faced by physicians and patients as they work through each of these activities. The result is a view of the medical encounter that takes the perspective of both physicians and patients in a way that is both rigorous and humane. Clear and comprehensive, this book will be essential reading for students and researchers in sociolinguistics, communication studies, sociology, and medicine.

Interviewing is a foundational user research tool that people assume they already possess. Everyone can ask questions, right? Unfortunately, that's not the case. Interviewing Users provides invaluable interviewing techniques and tools that enable you to conduct informative interviews with anyone. You'll move from simply gathering data to uncovering powerful insights about people.

Drawn from Dr. Suzanne M. Miller's nearly 15 years of experience as a Harvard pre-med tutor and CEO of MDadmit medical admissions, *Nailing the Medical School Interview* provides a detailed, step-by-step plan for how to tackle every aspect of traditional medical school interviews .

Cheng, a former McKinsey management consultant, reveals his proven, insider's method for acing the case interview.

His name is Dink. He has adventures all around the world... And he's an idiot. If Arthur Conan Doyle watched Fleischer Brother cartoons all day in the hospital after sustaining a severe head injury, he might write something like this. If Jack Handey wrote for *Weird Tales Magazine*, circa 1934, and had a pretty serious substance abuse problem, he might sue me for plagiarism. If *Forrest Gump*, instead of being a kind and gentle man who seems dim but has hidden depths was, you know, the opposite of that; he might be Dink. If you like pulp fiction, jokes, and you're not some kind of Brain Criminal, you'll definitely enjoy this book.
