CANCER CLINIC CAUSES WORST HEPATITIS OUTBREAK IN US HISTORY In the small farming community of Fremont, Nebraska, townspeople eagerly welcomed an acclaimed doctor as the first full-time oncologist at their new cancer treatment center-but the fanfare soon turned into a nightmare. During chemotherapy treatments, 857 patients who were already waging the fights of their lives against cancer, were inexplicably exposed to the deadly, blood-borne hepatitis C virus. At least ninety-nine of them contracted the lethal illness. The horror was unprecedented-this was the largest healthcare-transmitted outbreak of hepatitis C in American history. A Never Event-a term used to describe a preventable medical tragedy-is a searing story of recklessness, deception and betrayal. It's part mystery, part courtroom drama. Written by a survivor of the tragedy and an attorney who represented many of the victims, A Never Event is a wake-up call to medical and legal communities nationwide. "[A] harrowing account... I commend [McKnight's] advocacy and efforts to raise awareness about healthcare-related infections and other potentially life-threatening illnesses."-Hon. Shelley Berkley, congresswoman, Nevada "The wake-up call to doctors, nurses and to patients."-Joe Hardy, MD, Nevada State Assembly "A 'must-read' for patients." -Charles Stokes, president and CEO, CDC Foundation "[McKnight's] story has provided hope to people across the nation."-Lawrence Sands, DO, MPH

The new edition of Bruce Wingerd's The Human Body: Concepts of Anatomy and Physiology helps encourage learning through concept building, and is truly written with the student in mind. Learning Concepts divide each chapter into easily absorbed subunits of information, making learning more achievable. Since students in a one-semester course may have little experience with biological and chemical concepts, giving them tools such as "concept statements," "concept check" questions, and a "concept block study sheet" at the end of each chapter help them relate complex ideas to simple everyday events. The book also has a companion Student Notebook and Study Guide (available separately) that reinvents the traditional study guide by giving students a tool to help grasp information in class and then reinforce learning outside of class.

"Surveying Fundamentals and Practices, Sixth Edition," covers up-to-date surveying technology without losing perspective of the need to provide students with a strong foundation in traditional surveying fundamentals. Through clear explanations and applied examples, the text presents the methods of measuring and computing distances, angles, and directions. It provides students with a firm grasp of modern equipment and office and field procedures related to horizontal control surveys, property surveys, topographic surveys, roadway curve calculations, and construction layout surveys. The sixth edition offers students a "user-friendly" text that they will be able to rely on as a meaningful learning tool in class and at home. Plus! A companion student website, "MyConstructionKit," is now available! MyConstructionKit is an online resource that offers a wealth of study tools to engage students for a variety of Pearson construction management, architecture, and civil engineering technology textbooks!

Immigrant children and youth are the fastest growing segment of the U.S. population, and so their prospects bear heavily on the well-being of the country. However, relevant public policy is shaped less by informed discussion than by politicized contention over welfare reform and immigration limits. From Generation to Generation explores what we know about the development of white, black, Hispanic, and Asian children and youth from numerous countries of origin. Describing the status of immigrant children and youth as "severely understudied," the committee both draws on and supplements existing research to characterize the current status and outlook of immigrant children. The book discusses the many factors—family size, fluency in English, parent employment, acculturation, delivery of health and social services, and public policies—that shape the outlook for the lives of these children and youth. The committee makes recommendations for improved research and data collection designed to advance knowledge about these children and, as a result, their visibility in current policy debates.
