The Book has been thoroughly revised, keeping in mind the rapid technological advances in this mammoth industry and also the feedback received from various quarters. Relevant extracts from current SOLAS, IACS, Lloyd's Register, DNV and ABS Rules, have been included with permission. However, these must be used only for academic purposes. Relevant current documents onboard ships must be referred to, for the purpose of complying with Classification Societies' and other Statutory Requirements.

Fungi: Biology and Applications is a comprehensive, balanced introduction of the biology, biotechnological applications and medical significance of fungi. With no prior knowledge of the subject assumed, the opening chapters offer a broad overview of the basics of fungal biology, in particular the physiology and genetics of fungi. Later chapters move on to include more detailed coverage of topics such as proteomics, bioinformatics, heterologous protein expression, medical mycology, anti-fungal drug development and function, fungal biotechnology and fungal pathogens of economically important plants. Carefully structured, each chapter contains self-assessment exercises with answers included at the end of the book to enhance student understanding. \* A comprehensive treatment of the medical and economic importance of fungi to everyday life \* Chapters include revision sections and problems to reinforce key concepts \* Invaluable for undergraduates taking a first course on fungal biology or mycology. \* also of interest to those working within the field looking for an up-to-date introduction.

This book concisely describes the architecture of the oil and gas pipelines in the Black-Caspian Seas Region and analyzes the status quo and perspectives of oil and gas production in this region. The authors present numerous projects, each of which has made a substantial contribution to the development of pipeline transport and transit in this part of the world, and discuss them in detail. The topics covered include: the region's geographic characteristics; the region's hydrocarbon potential; Russian and EU policy on pipeline transport; Kazakhstan's pipeline policy; Chinese pipeline projects; the Bulgarian gas transmission system; environmental risks in the production and transportation of hydrocarbons; satellite monitoring; and subsea leak detection. This volume offers a valuable resource for politicians, specialists in the oil and gas business, decision-makers, and environmentalists alike.

The inspiration for the film *The Dark Divide* starring David Cross and Debra Messing, one of America's most esteemed natural history writers takes to the hills in search of Bigfoot—and finds the wildness within ourselves. Awarded a Guggenheim Fellowship to investigate the legends of Sasquatch, Yale-trained ecologist Dr. Robert Pyle treks into the unprotected wilderness of the Dark Divide near Mount St. Helens, where he discovers both a giant fossil footprint and recent tracks. On the trail of what he thought was legend, he searches out Indians who tell him of an outcast tribe, the Seeahtiks, who had not fully evolved into humans. A handful of open-minded biologists and anthropologists counter the tabloids Pyle studies, while rogue Forest Service employees and loggers swear of a vast conspiracy to deep-six true stories of unknown, upright hominoid apes among us. He attends Sasquatch Daze, where he meets scientists, hunters, and others who have devoted their lives to the search, only to realize that "these guys don't want to find Bigfoot—they want to be Bigfoot!" Since its original publication, the author's fresh experiences and finds have been added to his original work through an updated chapter. With an evaluation of recent DNA evidence from Bigfoot hair and scat, the study of speech phonemes in the "Sierra Sounds" purported Bigfoot recordings, an examination of the impact of the wildly popular Animal Planet series *Bigfoot Hunters*, the reemergence of the famous Bob Gimlin into the Bigfoot community, and more, *Walking With Bigfoot* keeps every Bigfoot enthusiast's mind wide open to one of the biggest questions in the land and brings Pyle's work on the "legend" of Bigfoot into the new century.

Every cell has developed mechanisms to respond to changes in its environment and to adapt its growth and metabolism to unfavorable conditions. The unicellular eukaryote yeast has long proven as a particularly useful model system for the analysis of cellular stress responses, and the completion of the yeast genome sequence has only added to its power. This volume comprehensively reviews both the basic features of the yeast general stress response and the specific adaptations to different stress types (nutrient depletion, osmotic and heat shock as well as salt and oxidative stress). It includes the latest findings in the field and discusses the implications for the analysis of stress response mechanisms in higher eukaryotes as well.

Neil Tennant offers the definitive statement of semantic anti-realism in this study that aims to reform

not only the theory of meaning but deductive practice across a broad range of discourses.

Providing a solid foundation of concepts and principles, this book maintains the fundamental focus of rehabilitation nursing: holistic care of the rehabilitation client to achieve maximum potential outcomes in functional and lifestyle independence.

WEAPONS ACQUISITION REFORM: Reform Act Is Helping DOD Acquisition Programs Reduce Risk, but Implementation Challenges Remain

The shipping industry has been growing in leaps and bounds over the past few decades. The answer to reduced manning, together with demanding operating schedules, has more often than not been automation. Hence the need of the hour for a seafarer is adequate knowledge of UMS environments and their supporting systems onboard ships. With almost 30 years of first-hand experience by each of us in this mammoth industry, we have seen the evolution from control elements and systems of the post 2nd world-war era to the most sophisticated components and networks available today. It has indeed been a wonderful journey through time! These experiences have been our guiding light; they have prompted us to share our acquired knowledge with our counterparts and students of the maritime industry.
