Migration and security: Navigating the risks. 17 Feb 2015. 'Control' and 'security' have moved to being central concerns in political and media narratives about migration in the UK. This trend is exemplified by the fact that since February 2014 'immigration and security' has existed as a single ministerial portfolio – held by James Brokenshire – even though in many respects, immigration policy and security are entirely different briefs.

The EU has adopted a double-pronged approach to dealing with this threat: (a) it has tried to ensure that the situation of sudden uncontrolled arrival of mixed migration flows does not repeat itself through a series of externally-focused policies: border security measures, financial incentives and specific migration management agreements with countries of migrant origin or transit, and (b) it has attempted creating a temporary burden-sharing system mechanism the EU, while simultaneously ...

atic because migration, security and the linkage between the two are inherently subjective concepts. They are dependent on who is defining the terms and who benefits by defining the terms in a given way. Although there has been considerable research on the subjects of migration and of security, few studies directly address the linkage between the two.

Migration and Security: Some Key Linkages

The Journal on Migration and Human Security (JMHS) is a peer-reviewed public policy publication of the Center for Migration Studies (CMS). The journal's theme of “human security” is meant to evoke the widely shared goals of creating secure and sustaining conditions in migrant sending communities; promoting safe, legal migration options; and developing immigration and integration policies that benefit sending and receiving communities and allow newcomers to lead productive, secure lives.

Migration is top of the global agenda – and for many politicians, policymakers and people, it is closely linked to security. The debate on migration and security is complex and multi-faceted. It is also often based on misleading information, unjustified fears and coloured by clichés and prejudices.

The response to international migration had always been double-folded: on one hand, migration is seen as a security threat to the identity and culture of the host country which affects its stability; and on the other hand, migration is seen as a humanitarian duty to provide international protection to people in need of it.

Migration and Security: A Handbook

Every day newspapers in the Western world carry articles about illegal immigrants, asylum seekers and other migrants. The focus of these articles varies greatly from migrants as a threat to one or another important social or societal interest, to migrants as an important asset to those same interests. The tone is most often emotional - whichever way the focus goes. The overall impact is to confuse: is migration good or bad? In this book Guild and van Selm seek to investigate these value assessments regarding migrants in Europe, the USA, Canada and Australia. While looking at issues such as security, human rights, legal systems, identity, racism, welfare, health and labour, the authors also respond to critics of immigration.

Climate migration, as an image of people moving due to sea-level rise and increased drought, has been presented as one of the main security risks of global warming. The rationale is that climate change will cause mass movements of climate refugees, causing tensions and even violent conflict. Through the lens of climate change politics and securitisation theory, Ingrid Boas examines how and why climate migration has been presented in terms of security and reviews the political consequences of such framing exercises. This study is done through a macro-micro analysis and concentrates on the period of the early 2000s until the end of September 2014. The macro-level analysis provides an overview of the coalitions of states that favour or oppose security framings on climate migration. It shows how European states and the Small Island States have been key actors to present climate migration as a matter of security, while the emerging developing countries have actively opposed such a framing. The book argues that much of the division between these states alliances can be traced back to climate change politics. As a next step, the book delves into UK-India interactions to provide an in-depth analysis of these security framings and their connection with climate change politics. This micro-level analysis demonstrates how the UK has strategically used security framings on climate migration to persuade India to commit to binding targets to reduce their greenhouse gas emissions. The book examines how and why such a strategy has emerged, and most importantly, to what extent it has been successful. Climate Migration and Security is the first book of its kind to examine the strategic usage of security arguments on climate migration as a political tool in climate change politics. Original theoretical, empirical, and policy-related insights will provide students, scholars, and policy makers with the necessary tools to review the effectiveness of these framing strategies for the purpose of climate change diplomacy and delve into the wider implications of these framing strategies for the governance of climate change.

This book is an interdisciplinary examination of several interconnecting aspects of migrant communities in the context of contemporary conflict and security. The book illustrates that within this globalised world, migrants have become key actors, living in the spaces between states, as well as within them. Arguing that migrants and their descendants are vital and complex constituencies for the achievement of security in this global age, the volume uses a number of case studies, including Palestinian, Sri Lankan, Irish and Somali diaspora communities, to explore the different ways that such groups intersect with issues of security, and how these attitudes and behaviours have evolved in the context of political transnationalism and the global economy. Comparative and econometric studies of migration can provide a wide lens but at times fail to capture the depth and complexity of these communities and attitudes within them. At the same time, empirically focused studies are often case-specific and, while rich in local detail, lack comparative breadth or the ability to make connections and see irregularities across a number of contexts that might be of interest to scholars beyond that specific area. This book connects these literatures together more thoroughly. In particular, it demonstrates that political, cultural, economic and social factors all play important roles in helping us understand the actual (and potential) roles of migrant communities in conflict and the establishment of sustainable security within contemporary society. Lastly, given this context, the book seeks to examine the challenges and opportunities that exist, for such a sustainable security strategy to be developed. This book will be of much interest to students of migration and diaspora communities, peace and conflict studies, security studies and ethnic conflict.

Having often been framed in terms of security concerns, migration issues have simultaneously given rise to issues of insecurity: on the one hand, security of borders, political, societal and economic security/insecurity in the host country; on the other, social, legal and economic concerns about human security, with regard to both EU citizens and migrants entering Europe. In terms of state security, migration is a core target of increasingly globally networked surveillance capabilities, whilst with respect to human security, it exposes the gap between the protections that migrants formally enjoy under international law and the realities they experience as they travel and work across different countries. Drawing on the latest research from across the EU, Security, Insecurity and Migration explores the concerns of states with regard to migration and the need to protect the fundamental rights of migrants. An interdisciplinary examination of the issues of security and insecurity raised by migration for states, their citizens and migrants themselves, this book will be of interest to scholars of politics, sociology and geography researching migration, race and ethnicity, human and state security and EU politics and policy.

This Handbook provides a state-of-the-art analysis of the critically important links between migration and security in a globalising world, and presents original contributions suggesting innovative and emerging frontiers in the study of the securitization of migration. Experts from different fields reflect on their respective conceptualisations of the migration-security nexus, and consider how an interdisciplinary and multifaceted dialogue can stimulate and enrich our understanding of the securitisation of migration in the contemporary world.

Through an interdisciplinary analytic lens that combines debates emerged in the fields of international relations, political science and sociology, Valeria Bello reveals how transnational dynamics have increased extremism, prejudiced attitudes towards others and international xenophobia. Bello begins her analysis by tracing similarities between Europe today and Europe before World War II to explain why prejudice is a global security threat and why it is arising as a current global concern within International Organizations. In such a light, Bello shows how changes in the International System and the attack on the UN practice of Intercultural Dialogue have become sources of new perceived threats and the reasons for which new exclusionary patterns have arisen. She argues that both those outcomes have been exacerbating the perceived clash of civilizations and the root causes of different fashions of extremisms. Bello concludes by portraying alternative ways to deal with these instabilities through a partnership of the different stakeholders involved, including both state and non-state actors at global, regional, national and local levels. International Migration and International Security provides a unique crosscutting angle from which to analyze the current socio-political crisis connected to the theme of international migration that the world is currently witnessing. Bello expertly shows that different paths for the world are possible and suggest ways to further promote Global Human Security through local, national, regional and global practices of Intercultural Dialogue.

Migration and especially irregular migration are politically sensitive and highly debated issues in the developed world, particularly in Europe. This book analyses irregular protection-seeking migration in Europe, with close attention to sub-Saharan migration into the EU, from the perspective of emancipatory security theory. Some individuals leave their countries because political, social, and economic structures largely fail to provide protection. This book examines how communities respond to migrants who seek protection and security, where migration is perceived as a source of insecurity by many in that community. The central aim of this critical analysis is to explore ideas and practices which can contribute to replacing the political structures of insecurity with emancipatory structures, where individuals (both irregular migrants and members of the receiving communities) enjoy security together, not opposed to each other. Drawing on the security dilemma, critical approaches to security, forced migration and trust, the book demonstrates how common life between two groups of individuals can be politically constructed, in tandem with limitations, risks, and possible handicaps of initiating such a construction in world politics. Rethinking Security in the Age of Migration will be of interest to students and scholars of migration studies, security studies, international relations, European politics and sociology.

The conflict in Eastern Ukraine and the European refugee crisis have led to a dramatic increase in forced displacement across Europe. Fleeing war and violence, millions of refugees and internally displaced people face the social and political cultures of the predominantly Christian Orthodox countries in the post-Soviet space and Southeastern Europe. This book examines the ambivalence of Orthodox churches and other religious

communities, some of which have provided support to migrants and displaced populations while others have condemned their arrival. How have religious communities and state institutions engaged with forced migration? How has forced migration impacted upon religious practices, values and political structures in the region? In which ways do Orthodox churches promote human security in relation to violence and 'the other'? The book explores these questions by bringing together an international team of scholars to examine extensive material in the former Soviet states (Ukraine, Russia, Georgia and Belarus), Southeastern Europe (Turkey, Greece, Serbia, Bulgaria and Romania), Western Europe and the United States.

This book focuses on the Mediterranean/MENA migration crisis and explores the human security implications for migrants and refugees in this troubled region. Since the Arab uprisings of 2010/2011, the Middle East and North Africa region has experienced major political transformations and called into question the legitimacy of states in the region. Displaced populations continue to suffer due to the major conflicts in Syria, Iraq and elsewhere, causing fragmentation and dis-integration of communities. Contributors to this volume analyze how and why this crisis differs significantly from previous migration/refugee flows in the region, explain the historical and political antecedents of this crisis which have played a part in its shaping, and explore the relationship between human security and the protection of vulnerable individuals and groups.

This book examines the management of migratory flows in the Mediterranean within an international security perspective. The intense migratory flows registered during the year 2015 and the tragedies in the Mediterranean Sea have tested the mechanisms of the Union's immigration and asylum policies and its ability to respond to humanitarian crises. Moreover, these flows of varying intensities and geographies represent a threat to the internal security of the EU and its member states. By using Spain and Italy as case studies, the author theorizes that the EU, given its inability to adopt and implement a common policy to effectively manage migratory flows on its Southern border, uses a deterrence strategy based on minimum common denominators.
