Munkres

$U$  containing  $x$  such that  
 $U \cap A$ . Show that  $A$  is  
open in  $X$ . Solution: Let  
 $C = \{U \mid U \text{ is open in } X, x \in U, U \cap A \neq \emptyset\}$   
be the collection of  
open sets  $U$  where  $x \in U$   
and  $U \cap A \neq \emptyset$ .

Suppose  $U_0 = \bigcup_{U \in C} U$ .  
Since  $X$  is a  
topological space,  $U_0$  is  
open in  $X$ . Clearly if  
 $x \in A$ , then  $x \in U_0$

I have been trying to do  
exercise 2 in section 53  
of Munkres' Topology  
for quite some time. I  
looked at solutions  
online, and I  
encountered two.

However, neither seem  
to make much sense to  
me. First the exercise:

Munkres

9789332549531: Books

This part of the book can be considered an introduction to algebraic topology. The latter is a part of topology which relates topological and algebraic problems. The relationship is used in both directions, but the reduction of topological problems to algebra is more useful at first stages because algebra
