The narwhal or narwhale (Monodon monoceros) is a medium-sized toothed whale that possesses a large " tusk " from a protruding canine tooth. It lives year-round in the Arctic waters around Greenland, Canada, and Russia. It is one of two living species of whale in the family Monodontidae, along with the beluga whale.

Narwhal - Wikipedia

The narwhal is the unicorn of the sea, a pale-colored porpoise found in Arctic coastal waters and rivers.

Narwhal, facts and photos - National Geographic

The narwhal looks like a cross between a whale and a unicorn with its long, spiraled tusk jutting from its head. Males most commonly have tusks, and some may even have two. The tusk, which can grow as long as 10 feet, is actually an enlarged tooth.

Narwhal | Species | WWF

Narwhal, (Monodon monoceros), also spelled narwal or narwhale, a small, toothed whale found along coasts and in rivers throughout the Arctic. Males possess a long, straight tusk that projects forward from above the mouth. Narwhal (Monodon monoceros).

narwhal | Habitat, Tusk, & Facts | Britannica

(CNN) Narwhals are known as the "unicorns of the sea," but the reason for the whales' showy tusks has long mystified scientists. Little was known about the tusk's function because narwhals spend...

We finally know why narwals have tusks (Hint: It has to do ...

Narwhals are fond of flatfish, cod, shrimp and squid and species like crab that they find on the seabed during their long dives. They use echolocation to help them find food and have an interesting way of eating —creating a sort of vacuum and sucking up their food. No one really knows if their tusk plays a role in hunting or feeding.

Narwhal | Unicorn of the Sea - Whale & Dolphin ...

Narwhal definition is - an arctic cetacean (Monodon monoceros) that reaches a length of about 16 feet (5 meters) and possesses in the male one or rarely two long, spirally twisted, pointed tusks. Did You Know?

Narwhal | Definition of Narwhal by Merriam-Webster

Often dubbed the unicorns of the sea, narwhals are strange and beautiful creatures with long tusks protruding from their heads. Members of the population of more than 80,000 can weigh up to 4,200 pounds and grow as long as 17 feet in length. Read on to learn more about these fascinating animals. 1.

Narwhals This species of whale has an unusual and mysterious long tusk, once harvested and sold as a unicorn horn for ten times its weight in gold!

Narwhals - National Geographic

The Narwhal's team of investigative journalists dives deep to tell stories about Canada's natural environment you can't find anywhere else. As a non-profit organization, our goal isn't to sell advertising or to please corporate bigwigs — it's to bring evidence-based news to the surface for all Canadians.

Home - The Narwhal

Narwhal was an adult male IceWing who was introduced in Winter Turning. In addition to being the former partner of Tundra, he was an IceWing prince, an advisor to Snowfall, and a warrior of at least the Second Circle. He was killed during the Battle of Jade Mountain by two empowered NightWing scouts.
