# Notes Respiratory System Chapter 22 And Digestive System

This is likewise one of the factors by obtaining the soft documents of this **notes respiratory system chapter 22 and digestive system** by online. You might not require more mature to spend to go to the ebook establishment as competently as search for them. In some cases, you likewise complete not discover the notice notes respiratory system chapter 22 and digestive system that you are looking for. It will agreed squander the time.

However below, gone you visit this web page, it will be in view of that categorically simple to get as competently as download lead notes respiratory system chapter 22 and digestive system

CHAPTER 22 The Respiratory System I.

Introduction to the Respiratory System A.

What is Respiration? Respiration is

defined as the exchange of gases (most notably oxygen and carbon dioxide)

between the atmosphere, lungs, blood, and

tissues. Respiration can be subdivided into

three basic components: 1.

Exchange of O<sub>2</sub> and CO<sub>2</sub> across the respiratory membrane is Influenced by: 1.) Partial pressure gradients and gas solubilities 2.) Alveolar Ventilation-pulmonary blood perfusion coupling 3.) Structural characteristics of the respiratory membrane: 152869548: Partial pressure gradient for CO<sub>2</sub> in the lungs is less steep:

CH 22 THE RESPIRATORY SYSTEM

Major function of the respiratory system:

Supply the body with oxygen and dispose of carbon dioxide

Respiration: Involves both the respiratory and the circulatory systems

Four processes, collectively called respiration, accomplish this function:

Pulmonary ventilation (breathing):

movement of air into and out of the lungs

External respiration: O<sub>2</sub> and CO<sub>2</sub>

exchange between the lungs and the blood

Transport of respiratory gases: O<sub>2</sub> and

CO<sub>2</sub> in the blood

Bi 303 Chapter 22 Notes: Anatomy of the Respiratory System  
Respiration: Ventilation of the lungs (breathing) or the use of oxygen in cellular metabolism  
Respiratory system-An organ system that rhythmically takes in air and expels it from the body-Supplying the body with oxygen and expelling carbon dioxide that it generates  
Functions-Gas exchange o It provides for oxygen and carbon dioxide exchange between the blood and air-  
Communication o Serves for speech and other vocalization (Laughing ...
