Oracle Database Javadevelopers Guide | www.uppercasing
Oracle Database provides support for developing, storing, and deploying Java applications. This chapter introduces the Java language to Oracle PL/SQL developers, who are accustomed to developing server-side applications that are integrated with SQL data.

Introduction to Java in Oracle Database
Oracle Database runs standard Java applications. However, the Java-integrated Oracle Database environment is different from a typical Java development environment. This chapter describes the basic differences for writing, installing, and deploying Java applications within Oracle Database. This chapter contains the following sections:

Oracle Database Java Developer's Guide - TechyLib
What are the changes in 19.7.0.0? The Oracle JDBC drivers jars can be used in isolation however, depending on use cases, additional/companion jars are required. In this release, we move the packaging on Maven Central from pre-established dependencies between artifacts to giving Java developers a ...

Maven Central Developers Guide - Oracle
In the Oracle Database SQLJ implementation, the translator calls a Java compiler to compile the Java source code. When your SQLJ application runs, the SQLJ run time calls JDBC to communicate with the database. SQLJ also enables you to catch errors in your SQL statements before run time. JDBC code, being pure Java, is compiled directly.
