The Routledge Handbook of International Criminology brings together the latest thinking and findings from a diverse group of both senior and promising young scholars from around the globe. This collaborative project articulates a new way of thinking about criminology that extends existing perspectives in understanding crime and social control across borders, jurisdictions, and cultures, and facilitates the development of an overarching framework that is truly international. The book is divided into three parts, in which three distinct yet overlapping types of crime are analyzed: international crime, transnational crime, and national crime. Each of these perspectives is then articulated through a number of chapters which cover theory and methods, international and transnational crime analyses, and case studies of criminology and criminal justice in relevant nations. In addition, questions placed at the end of each chapter encourage greater reflection on the issues raised, and will encourage young scholars to move the field of inquiry forward. This handbook is an excellent reference tool for undergraduate and graduate students with particular interests in research methods, international criminology, and making comparisons across countries.

Victimology, Seventh Edition, introduces students to the criminal justice system in the United States and its impact on crime victims. Authors William Doerner and Steven Lab provide a fresh look at the theoretical basis of victimology and then present the key facets of crime and its effects. They examine financial and social costs both to the individual and to the larger community. This new edition uses the theoretical foundation of victimology to establish a clear conceptual framework and reduce repetition. Emerging trends in the field receive greater emphasis in this edition, including non-adversarial resolutions that offer remediation for crime victims. Crimes like intimate-partner violence and victimization in work or school environments continue to take a toll, and the authors examine efforts to prevent these crimes as well as responses after an incident occurs. Doerner and Lab challenge students to rethink the current response to crime victims, and to develop improved approaches to this costly social issue. Online supplements are available for both professors and students. A new chapter on explaining victimization provides context and a backdrop for examining emerging trends A new chapter on hate crimes delves into the complexities faced by victims as they negotiate the reporting process The text is supplemented by learning tools including chapter-by-chapter learning objectives, key terms,

How should the needs of victims of crime be met by the criminal justice system? Have the rights of victims been neglected in order to ensure that a defendant is brought to 'justice'? Who are the victims of crime and why are they targeted? This new book examines the theoretical arguments concerning victimization before examining who victims actually are and the measures taken by the criminal justice system to enhance their position. Particular attention is paid to the victimization of women, LGBT persons, minority ethnic persons and the elderly. The book engages in a detailed exposition of the law's response to such victimization, focusing on the measures adopted in international human rights law, by the Council of Europe, and in English law and policy. It also assesses alternative models of victim participation in criminal proceedings in European jurisdictions such as Germany, Sweden and the Netherlands. Adopting an interdisciplinary approach which encompasses law, criminology and social policy, the book is ideal for undergraduates taking an option in victimology, race and crime, or gender and crime, whatever their disciplinary background.

criminologists in a single volume. While Irish criminology can be characterised as a nascent but dynamic discipline, it has much to offer the Irish and international reader due to the unique historical, cultural, political, social and economic arrangements that exist on the island of Ireland. The Handbook consists of 30 chapters, which offer original, comprehensive and critical reviews of theory, research, policy and practice in a wide range of subject areas. The chapters are divided into four thematic sections: Understanding crime examines specific offence types, including homicide, gangland crime and white-collar crime, and the theoretical perspectives used to explain them. Responding to crime explores criminal justice responses to crime, including crime prevention, restorative justice, approaches to policing and trial as well as post-conviction issues such as imprisonment, community sanctions and rehabilitation. Contexts of crime investigates the social, political and cultural contexts of the policymaking process, including media representations, politics, the role of the victim and the impact of gender. Emerging ideas focuses on innovative ideas that prompt a reconsideration of received wisdom on particular topics, including sexual violence and ethnicity. Charting the key contours of the criminological enterprise on the island of Ireland and placing the Irish material in the context of the wider European and international literature, this book is essential reading for those involved in the study of Irish criminology and international and comparative criminal justice.
