## Post Harvest Technology Of Flowers And Ornamental Plants

As recognized, adventure as with ease as experience not quite lesson, amusement, as capably as union can be gotten by just checking out a book post harvest technology of flowers and ornamental plants then it is not directly done, you could tolerate even more as regards this life, not far off from the world.

We have enough money you this proper as with ease as easy artifice to get those all. We have the funds for post harvest technology of flowers and ornamental plants and numerous book collections from fictions to scientific research in any way. in the

Post- harvest practices . 1.Lifting of  
corm. After 45 days of spike  
harvest,the corm and cormels are  
lifted from the field and stored.The  
best time to lift corm is until all of the  
plant matter has turned brown and  
died back. 2.Grading . Gladiolus spikes  
are graded into following five grades  
according to the spike length and  
number of floret present.

Post-harvest processes include the integrated functions of harvesting, cleaning, grading, cooling, storing, packaging, transporting and marketing. The technology of post-harvest handling bridges the gap between the producer and the consumer – a gap often of time and distance.

~~postharvest technology~~

Hydrating solutions: After harvest, hydrating solutions are used to facilitate water uptake and restore the turgor of wilted flowers. Hydrating solutions are usually warm water (110F) with a biocide (such as slow release chlorine tablets), acidified to pH 3.5 to 5.0 with citric acid and include a wetting agent.

## Harvesting and Handling Cut Flowers

In agriculture, postharvest handling is the stage of crop production immediately following harvest, including cooling, cleaning, sorting and packing. The instant a crop is removed from the ground, or separated from its parent plant, it begins to deteriorate. Postharvest treatment largely determines final quality, whether a crop is sold for fresh consumption, or used as an ingredient in a processed food product.
