Research Methodology From Philosophy Of

You need to discuss the implications of your research philosophy on the research strategy in general and the choice of primary data collection methods in particular. The Essence of Research Philosophy . Research philosophy deals with the source, nature and development of knowledge. In simple terms, a research philosophy is belief about the ways in which data about a phenomenon should be collected, analysed and used.

Chapter Three: Research Methodology

Research philosophy is an important part of research methodology. Research philosophy is classified as ontology, epistemology and axiology. These philosophical approaches enable to decide which approach should be adopted by the researcher and why, which is derived from research questions (Saunders, Lewis, & Thornhill, 2009).

Interpretive research approaches are derived from research philosophy that is adopted. According to Dumke (2002) the two main research approaches are deductive and inductive. The inductive approach is commonly referred to when theory is derived from observations. Thus, the research begins with a specific observation and measures.

Science to . . . Communications In Cybernetics Systems

Choosing an appropriate research philosophy is an important part of the research methodology. In fact as Guba & Lincoln, (1982) have propounded, philosophical paradigm within research hold utmost importance, as it is the “basic belief system or world view that guides the investigation” (p. 105). The term philosophy in research refers to the development of knowledge and the nature of that knowledge.
