A Night in London chronicles the diverse and often conflicting emotional, ideological and political aspirations of an entire generation of Indian students in Europe. The novella sheds light on the dynamics of late imperial culture-English working-class politics, anti-colonial sentiment and race relations-like no other sustained narrative by an expatriate Indian author of the same period. Long considered a landmark in twentieth-century Urdu fiction, A Night in London is being made available in English for the first time in a

Made in India examines seemingly disparate and high profile events in postcolonial India that captured national and transnational/diasporic interest since the 1990s: The emergence of the Indian homosexual, the new trans/national heterosexual woman, lesbian suicides, marriage and kinship contracts in small towns around India and the simultaneous evolution of the modern homophobia and lesbian NGOs. These events demonstrate the material, political, and cultural contexts within which postcolonial subjects negotiate

their lived experiences within moments of decolonization and recolonization.

Much of world ' s documentary heritage rests in vulnerable, little-known and often inaccessible archives. Many of these archives preserve information that may cast new light on historical phenomena and lead to their reinterpretation. But such rich collections are often at risk of being lost before the history they capture is recorded. This volume celebrates the tenth anniversary of the Endangered Archives Programme at the British Library, established to document and publish online formerly inaccessible and neglected archives from across the globe. From Dust to Digital showcases the

historical significance of the collections identified, catalogued and digitised through the Programme, bringing together articles on 19 of the 244 projects supported since its inception. These contributions demonstrate the range of materials documented — including rock inscriptions, manuscripts, archival records, newspapers, photographs and sound archives — and the wide geographical scope of the Programme. Many of the documents are published here for the first time, illustrating the potential these collections have to further our understanding of history.

European and Arab versions of the Crusades have little in common. For Arabs, the twelfth and thirteenth centuries were years of strenuous efforts to repel a brutal and destructive invasion by barbarian hordes. Under Saladin, an unstoppable Muslim army inspired by

prophets and poets finally succeeded in destroying the most powerful Crusader kingdoms. The memory of this greatest and most enduring victory ever won by a non-European society against the West still lives in the minds of millions of Arabs today. Amin Maalouf has sifted through the works of a score of contemporary Arab chroniclers of the Crusades, eyewitnesses and often participants in the events. He retells their stories in their own vivacious style, giving us a vivid portrait of a society rent by internal conflicts and shaken by a traumatic encounter with an alien culture. He retraces two critical centuries of Middle Eastern history, and offers fascinating insights into some of the forces that shape Arab and Islamic consciousness today. 'Well-

researched and highly readable.' Guardian 'A useful and important analysis adding much to existing western histories ... worth recommending to George Bush.' London Review of Books 'Maalouf tells an inspiring story ... very readable ... warmly recommended.' Times Literary Supplement 'A wide readership should enjoy this vivid narrative of stirring events.' The Bookseller 'Very well done indeed ... Should be put in the hands of anyone who asks what lies behind the Middle East's present conflicts.' Middle East International

On December 27, 1979, the USSR invaded Afghanistan to save an endangered communist regime. The People's Democratic Party of Afghanistan, founded in 1965 but

almost immediately riven into two hostile wings, had been induced by Moscow into unifying in 1977 in order to seize power the following year. Within weeks, however, the majority Khalqi faction had driven out the rival Parchamis, only to discover that its rigid Marxism-Leninism was no match for Islam. As the Khalqi position deteriorated, Moscow thought to regain control by forceful replacement of the PDPA leaders with Parchamis. Instead, their invasion only consolidated popular determination to eject an alien ideology. In Afghanistan's Two-Party Communism, Anthony Arnold brings these dramatic developments to life, examining Parcham and Khalq in the context of the cultural, ethnic, and class factors that distinguish their leaders

and separate constituencies. He analyzes the PDPA's development through 1982 and closes with speculation on the degree of Soviet commitment to communism in Afghanistan. Written in a lively, penetrating style, yet with a wealth of detail and analysis, Arnold's book reflects the intimate feel for the country that he acquired while serving there. His multilingual source material includes hitherto classified documents, and the appendixes (biographic sketches of PDPA leaders, translations of key party documents, charts of party and state personnel changes) will provide valuable sources for other researchers.

This book examines all verses of the Quran involving

knowledge related concepts. It begins with the argument that an analysis of the Quranic concept of ignorance points to epistemic virtues that can pave our way towards gaining knowledge and/or understanding. It deals with the Quranic concepts of perceptual, rational, and revelatory knowledge as well as understanding and wisdom in the light of recent discussions in Western analytic epistemology. It also argues that the relevant Quranic verses seem to involve concept of an epistemic conscience whose proper exercise can yield knowledge or understanding. While not overlooking the Quranic emphasis on revelation as a source of knowledge, the book draws our attention to a remarkable overlap between some

strains of contemporary virtue epistemology and Quranic approach to knowledge. It shows that the Quranic verses suggest a progressive sequence from propositional knowledge to understanding to wisdom.
